

Alan German & Chris Taylor

Ottawa PC Users' Group

February 22, 2023

Follow-up

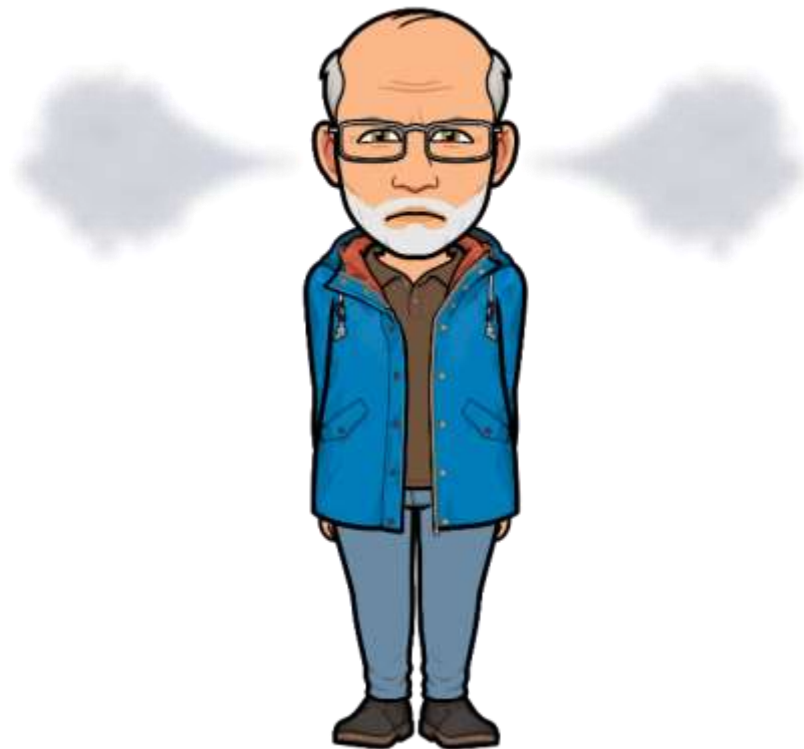

Chris's rant Windows 11 and File History

- Q&A 2023-02-16
 - Alan detailed setting up **File History**
- File History is **great** (w/a few oddities) on Windows 10
 - most operations can be done through **Settings**
 - a few things can only be done through **Control Panel**
- **Chris's rant about Windows 11**
- Microsoft *completely removed* File History from **Settings**
- Not a problem
 - if everything could be done in **Control Panel**
 - **it can't**
- Most significantly
 - *no ability to add additional folders to be backed up!!!!*

Follow-up

The following slides **only** needed if

- on Windows 11, and
- want to use File History

Follow-up

Moving File History drive to a new computer

- If moving a File History backup drive
 - from an old Win 10 computer to a new Win 11 computer
- *Everything* backed up by File History *while* it was on Win 10 still recoverable (all old versions of files)
 - if you moved the File History drive as per <https://www.glasswire.com/blog/2022/08/24/moving-your-file-history-to-a-new-computer-by-chris-taylor/>

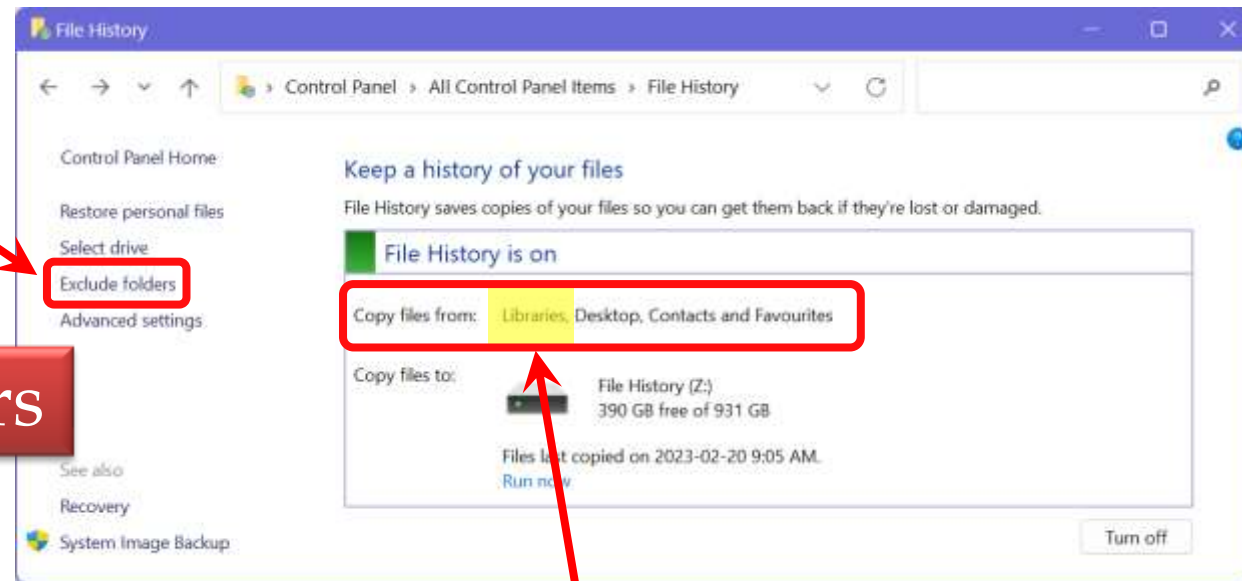

Follow-up

Microsoft *purposefully* broke File History in Windows 11

- Only *Libraries, Desktop, Contacts & Favourites* backed up by File History moving forwards
 - no **Settings** app for File History
 - can only use **Control Panel** to configure File History

Can *exclude* folders

No option to *add* folders

But *Libraries* are backed up

Follow-up

Libraries to the rescue

- File History backs up all libraries by default
- Libraries are simply pointers to one or more locations
 - default libraries: *Documents, Music, Pictures, & Videos*
 - a library can contain any number of folders located anywhere
- To back up additional folders using File History
 - add them to a library!
- Can add additional folders to existing libraries, *or...*
- *Why not create a brand new library?*
 - helps keep things organized
 - single library
 - only exists to allow File History to back up additional folders

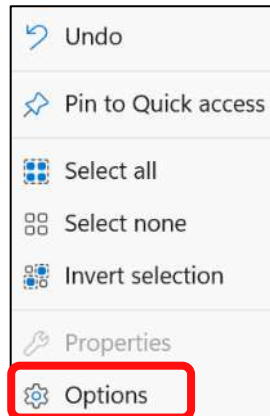

Follow-up

Working with Libraries

2-click ellipsis

1-*Libraries* exist near bottom of navigation pane

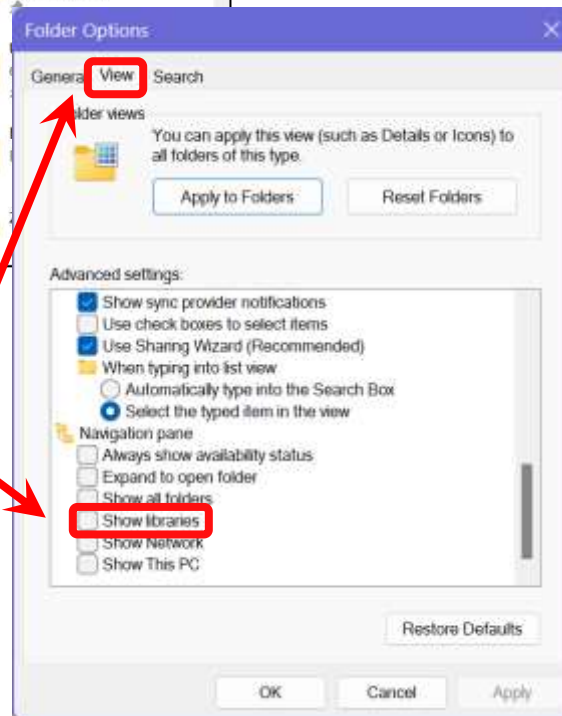

- not shown by default

3-choose *Options*

4-on *View* tab

- check *Show libraries*

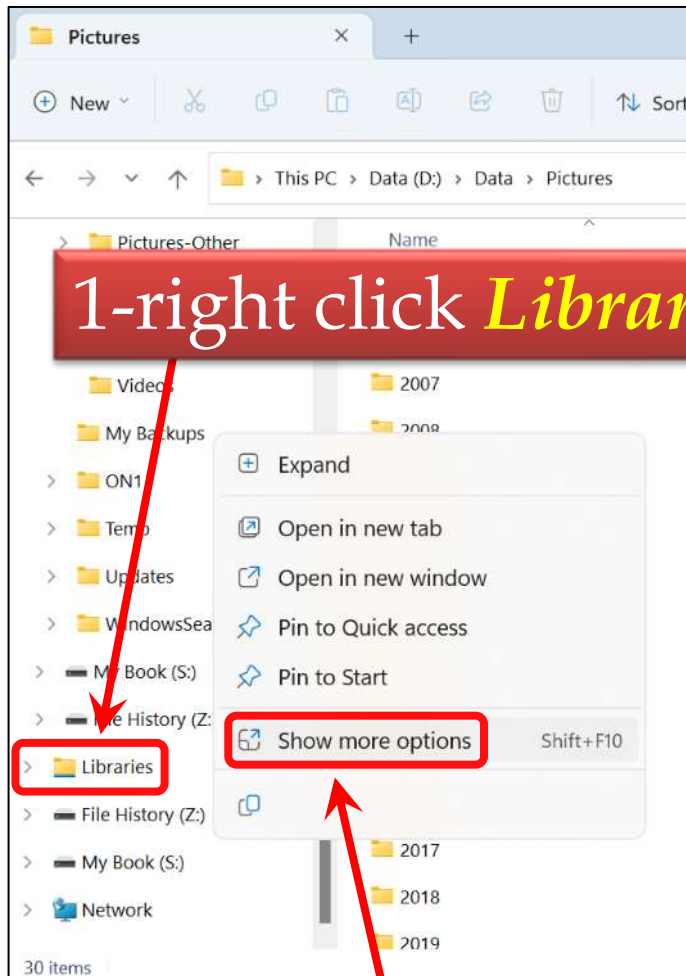

Follow-up

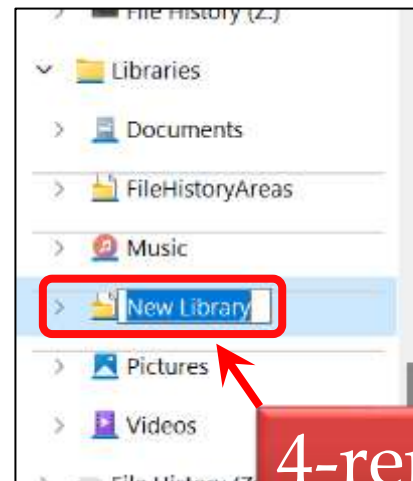

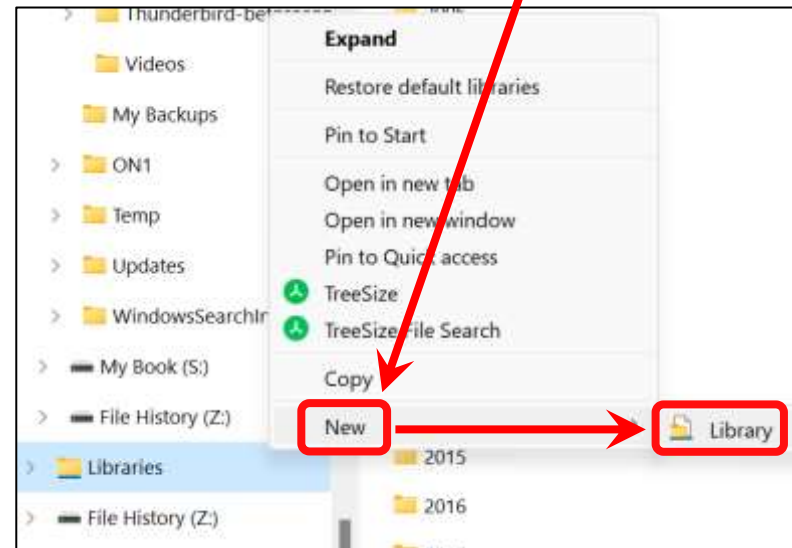

Create a new library

3-click *New* > *Library*

1-right click *Libraries*

2-click *show more options*

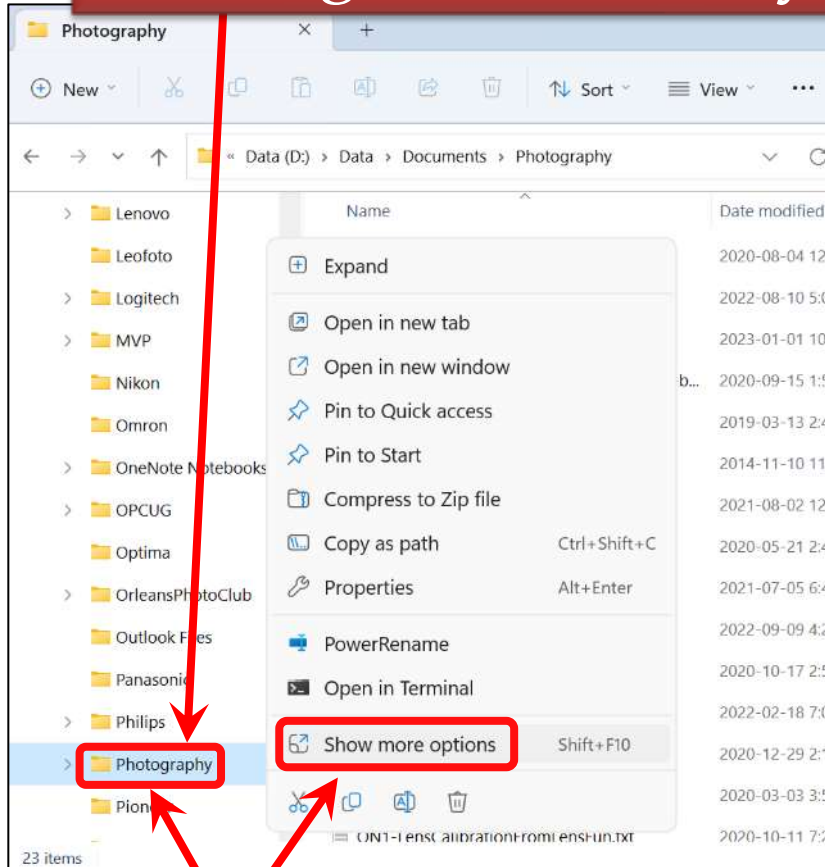

4-rename Library

- maybe *FileHistoryAreas*

Follow-up

Adding folders to libraries

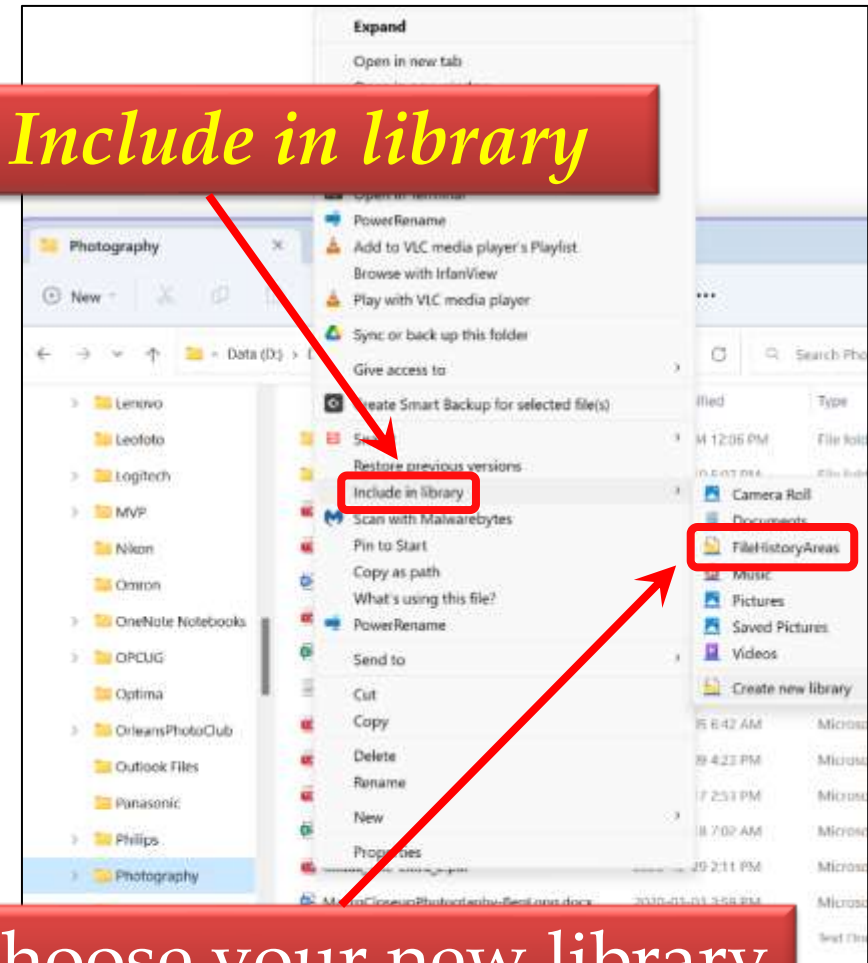

1-Navigate to folder you want File History to back up

2-Right-click folder

- choose *Show more options*

3-click *Include in library*

4-choose your new library

Chris's rant

- Microsoft went out of its way to break things
- Moderator in Microsoft *Answers* forum
 - *File History has been deprecated*

"Deprecated" means **we intend to remove the feature or capability from a future release**. The feature or capability will continue to work and is fully supported until it is officially removed. This deprecation notification can span a few months or years. After removal, the feature or capability will no longer work. Jan 13, 2023

BOOOO!

- File History works wonderfully
 - near real-time backup of important data files
 - keep potentially year's worth of versions of documents
 - really easy to retrieve old versions of documents
- Why deprecate File History?
 - Microsoft has not replaced it with anything

Introducing the Minecraft x Crocs collection

By Steve Clarke, Editor

<https://blogs.windows.com/windowsexperience/2023/02/16/introducing-the-minecraft-x-crocs-collection/>

Browser extensions

- Do you find any browser extensions useful?
- Which extensions for which browsers?

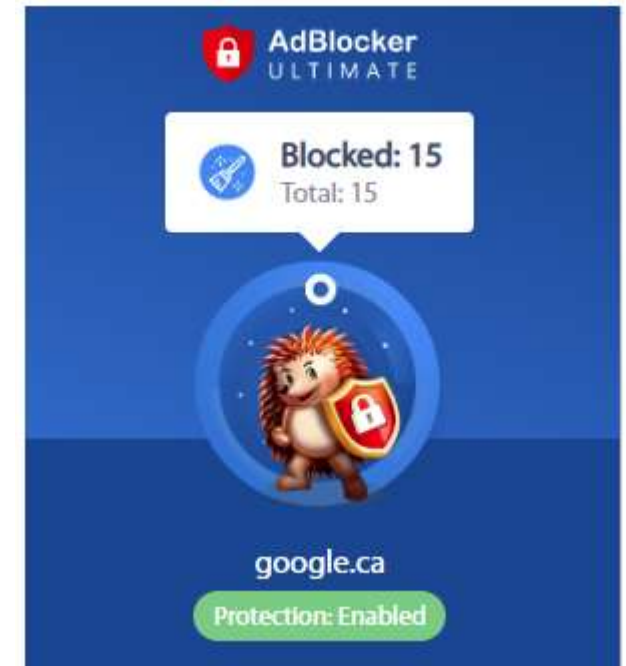

AdBlocker Ultimate

- The only browser extension that I use is AdBlocker Ultimate
- My default browser is Firefox, but I also use Edge and Chrome
- All browsers are configured to use AdBlocker Ultimate and show an extension icon

<https://adblockultimate.net>

Harvey Hope

uBlock Origin

- uBlock Origin is not an "ad blocker", it's a wide-spectrum content blocker
- Blocks ads, trackers, coin miners, popups, and more through the use of filters
- CPU and memory efficiency is a primary feature
- Link to Firefox extension:

<https://addons.mozilla.org/en-CA/firefox/addon/ublock-origin/>

Jeff Dubois

StrongVPN - The Fastest Proxy Extension

- Browse the web without borders
- Change your virtual location
- Access websites, videos, and more from around the world
- Lightning-fast speed.
- Link to Chrome extension:

<https://chrome.google.com/webstore/detail/strongvpn-the-fastest-pro/ahcoedgggbhcdgmhhhhliafnbcifmdlh>

Jeff Dubois

Google Translate

- I read a fair bit of Francophone material and this helps me out tremendously
- On my Chrome Box, the extension automagically translates anything not English
- On my Windows device, I have to left-click the extension and tell it I want the translation

<https://chrome.google.com/webstore/detail/google-translate/aapbdbdomjkkjkaonfhkkikfgjllcleb>

Google Translate

Stewart Bruce

Google Analytics Opt-out Add-on

- Tells the Google Analytics JavaScript not to send information to Google Analytics.
- No idea if this is effective, but I like the idea of minimizing targeted advertising and search results.

<https://chrome.google.com/webstore/detail/google-analytics-opt-out/flloajicojecljbmfodhfapmkghcbnh?hl=en>

Stewart Bruce

JavaScript Toggle On and Off

- A bulletproof method to disable JavaScript execution in both standard and private modes
- Note that, after installation, JavaScript execution is enabled, so you need to click the toolbar button to disable execution
- Link for Firefox extension:

<https://addons.mozilla.org/en-CA/firefox/addon/javascript-toggler/>

Jeff Dubois

A F.B. Purity

- Fluff Busting (F.B.) Purity lets you clean up and customize Facebook
- It has a myriad of features for eliminating the junk and clutter on Facebook
- Link for Firefox extension:

<https://www.fbpurity.com/>

Jeff Dubois

Behind the Overlay

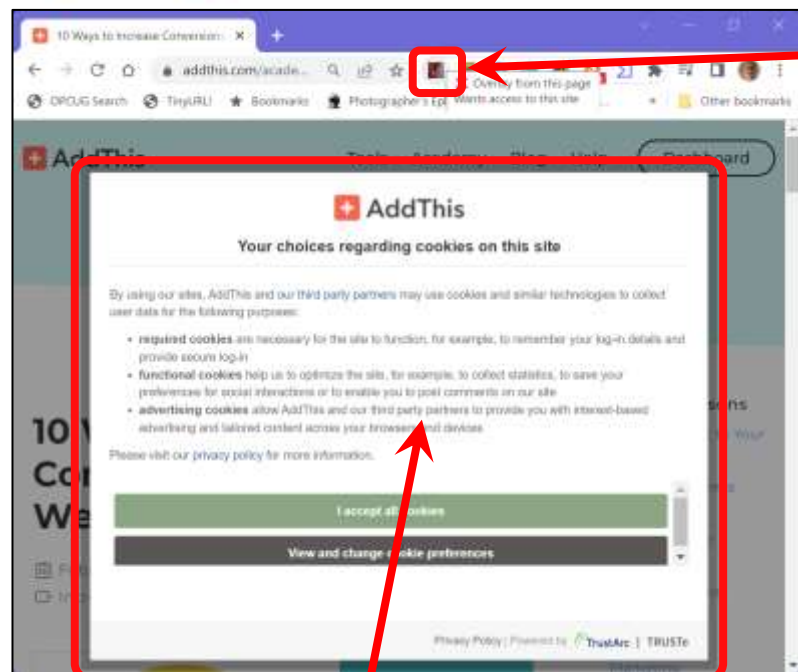

Click icon for *Behind the Overlay*

• or

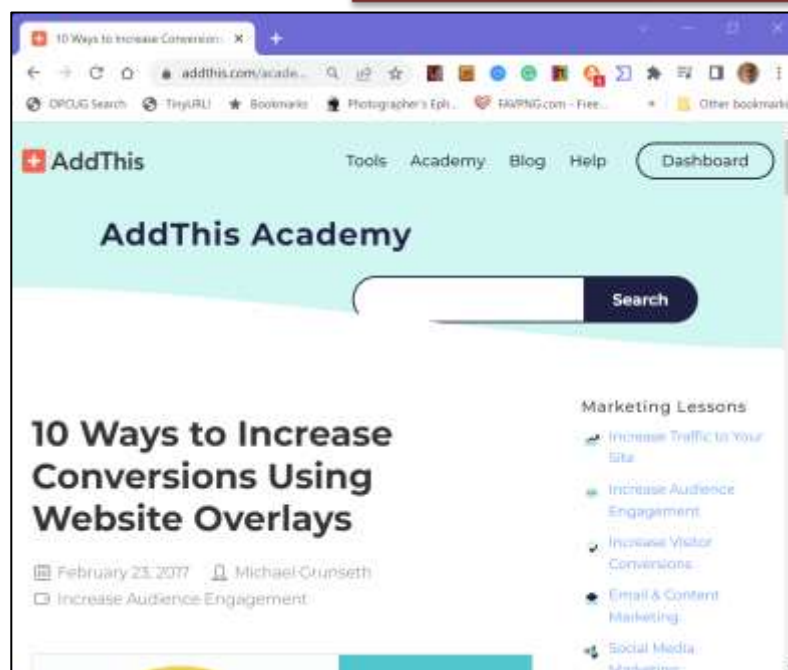

Ctrl

Shift

X

Annoying overlay covers page

Chromium browsers (Chrome, Edge, Brave, Opera...)

<https://chrome.google.com/webstore/detail/behind-the-overlay/ljipkdpcjbmhkdjjmbbaggebcnednbbme>

Firefox

https://addons.mozilla.org/en-CA/firefox/addon/behind_the_overlay/

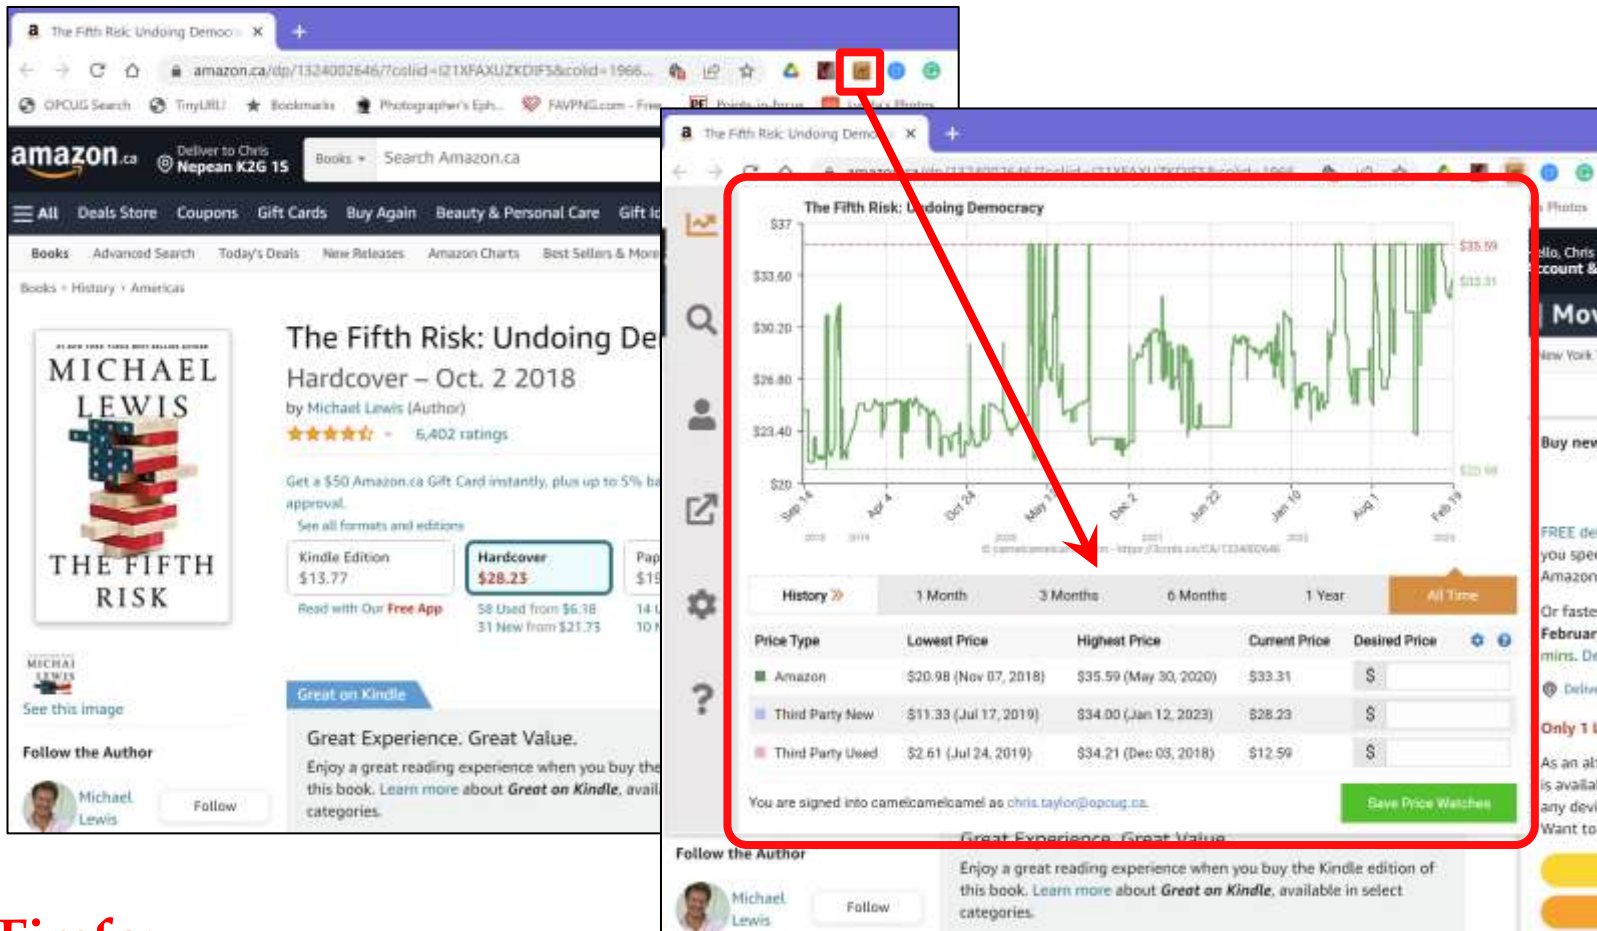

Chris Taylor

The Camelizer

Amazon price history

- set alerts (with free account)

Firefox

<https://addons.mozilla.org/en-CA/firefox/addon/the-camelizer-price-history-ch/>

Chromium browsers (Chrome, Edge, Brave, Opera...)

<https://chrome.google.com/webstore/detail/the-camelizer/ghnomdcacenbmilgjigehppbamfndblo>

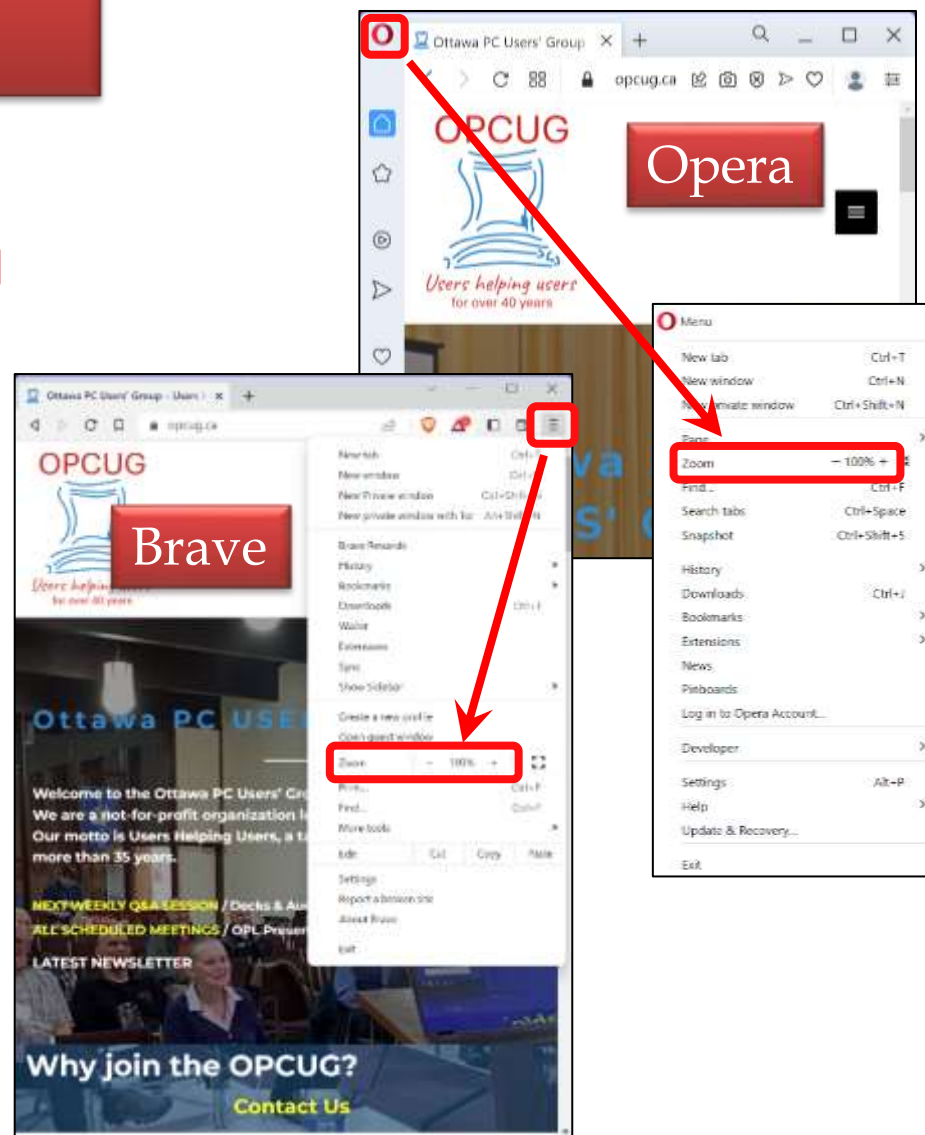

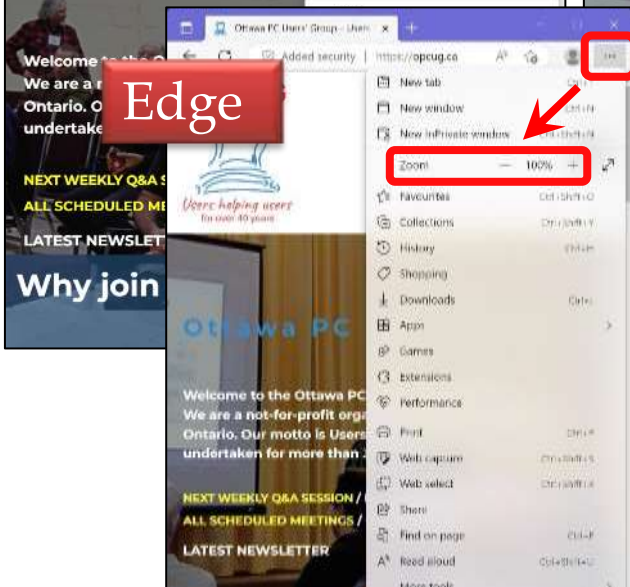

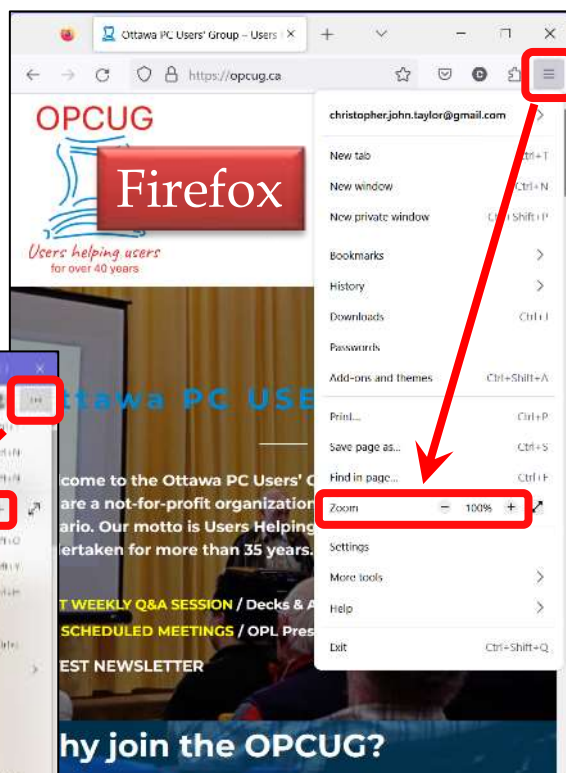

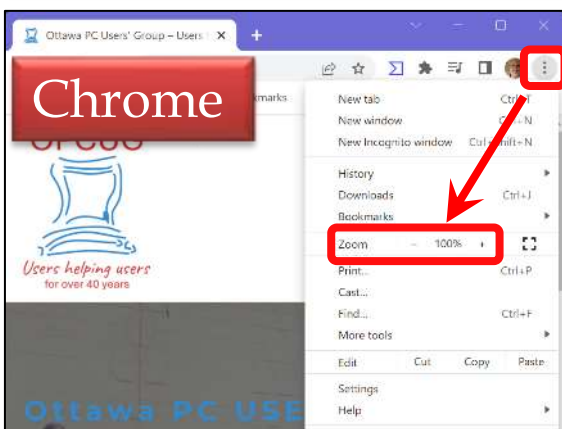

Chris Taylor

Zooming web pages

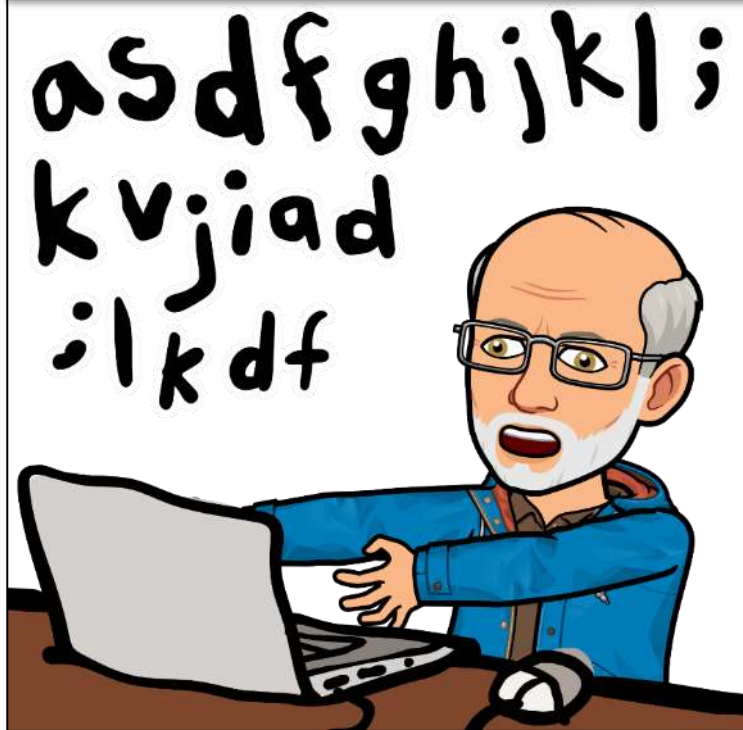

Every web browser lets you zoom in/out on pages

- click the menu
- click, **-**, **100%** or **+** next to **Zoom** option

Faster zooming

Use the keyboard!

Ctrl

+

Zoom in

Ctrl

-

Zoom out

Ctrl

0

Zoom to 100%

- that's Ctrl-**zero**

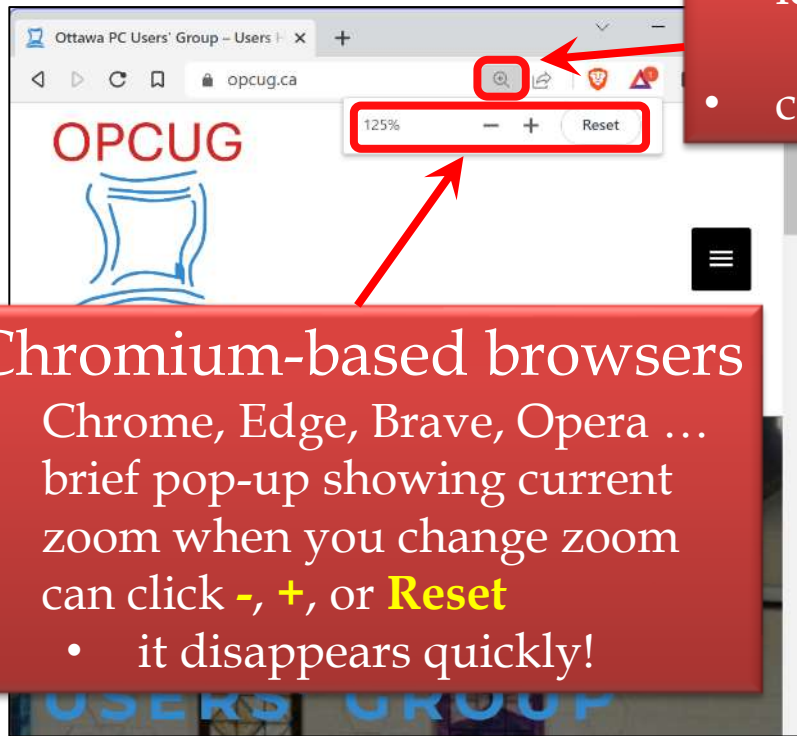

Works with

- numeric keypad
- number row above letters
 - *don't need to use shift key*
 - = + on same key 

Zoom range varies slightly between browsers

- generally close to
 - 30%, 50%, 67%, 80%, 90%
 - 110%, 120%, 133%, 150%, 170% 200%, 240%, 300%, 400%, 500%

- icon next to URL
 - if other than 100%
- click to get zoom box back

Chromium-based browsers

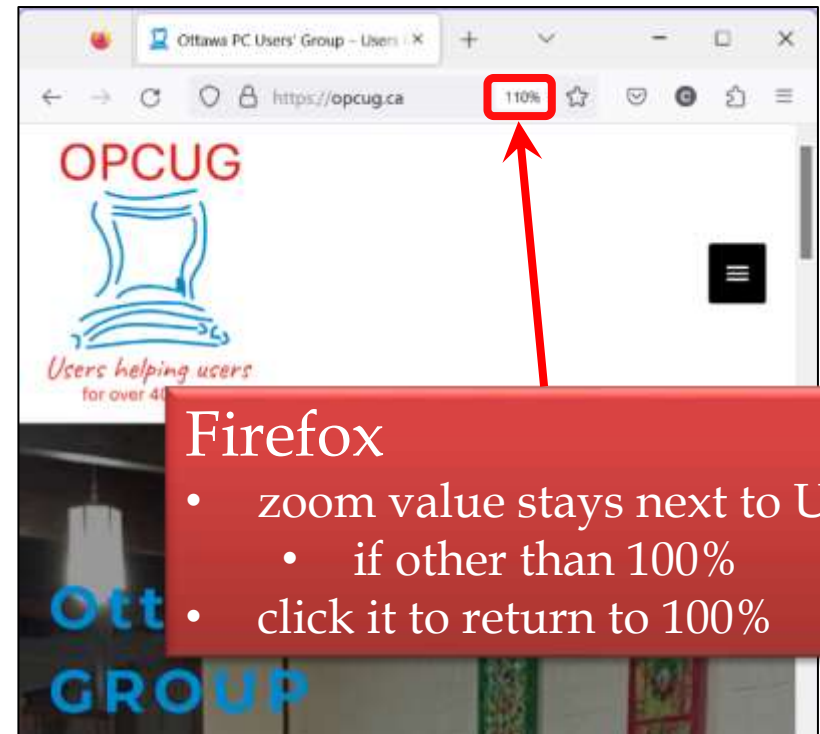

- Chrome, Edge, Brave, Opera ...
- brief pop-up showing current zoom when you change zoom
- can click -, +, or **Reset**
 - it disappears quickly!

- + means you are zoomed in

- - means you are zoomed out

Firefox

- zoom value stays next to URL
 - if other than 100%
- click it to return to 100%

Some other programs support
Ctrl +, -, 0 to zoom

Stewart on

Sunbird (iMessage on Android)

Currently in beta development, access is granted by invitation thru signup on website, [sunbirdapp.com](https://www.sunbirdapp.com)

Main feature: iMessage on Android. Uses Apple ID with an Android app to seamlessly integrate into iMessage ecosystem

Secondary feature; planning on integration with ALL message services

Sunbird Messaging

Universal
Messenger

One App to call
them All!

???? Apple has not commented yet on the use of it's ID. If this usage is rejected, accounts could be locked so using an existing Apple ID for this beta is putting it at risk.

This leads to questions about temporary IDs and whether there will be problems if Sunbird makes it to full release.

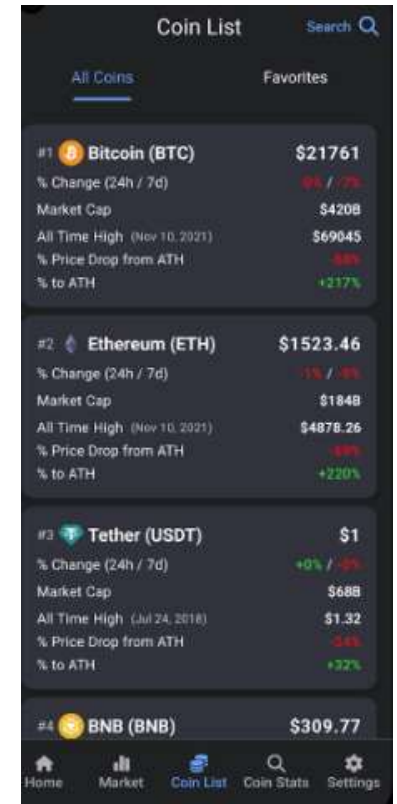

<https://www.sunbirdapp.com>

Controlling context menus

- Right-clicking usually brings up a context menu
- Programs love to add themselves to this menu
- How do you tame the list if it gets out of control?

For example, I don't recall using PowerRename

I must have done at some time since this is one of the PowerToys

But now, how do I delete the context menu entry?

Mr. Google knows everything!
