Kaspersky Anti-Virus

- Last week we had an item on updating Windows device drivers
- This led to a discussion on anti-virus and security suite software
- A question posted in the Chat window was not answered at the time:

How do you rate Kaspersky?

- So, how do OPCUG members rate Kaspersky?

- There is the controversy about the U.S. banning sale in the US of products from Kaspersky:

“...concerns the firm is closely tied to Russia and poses a security risk.”

<https://globalnews.ca/news/10580200/kaspersky-cyber-product-us-ban/>

- If anyone is strictly concerned about the effectiveness of Kaspersky in terms of antivirus etc., note that it is one of the main AV products out there
- This spring AV Test rated it as a "Top Product"

April 2024

kaspersky Plus 21.16

- But I don't worry a lot about placement on rating scales
- In my "*Protecting your PC*" presentation, I advocate just picking any of the main AV products (and Kaspersky certainly fits the bill there) and keeping it up to date
- Having said that, there are free AV solutions, such as Microsoft Defender, that are considered top-tier
- Certainly, don't try to chase the latest "winner" in comparative reviews - that's a mug's game

Chris Taylor

Kaspersky Shuts Down US Operations Following Nationwide Ban

Kaspersky is reportedly closing its US office and laying off staff weeks after the US banned the sale of its antivirus software in the country and sanctioned company executives.

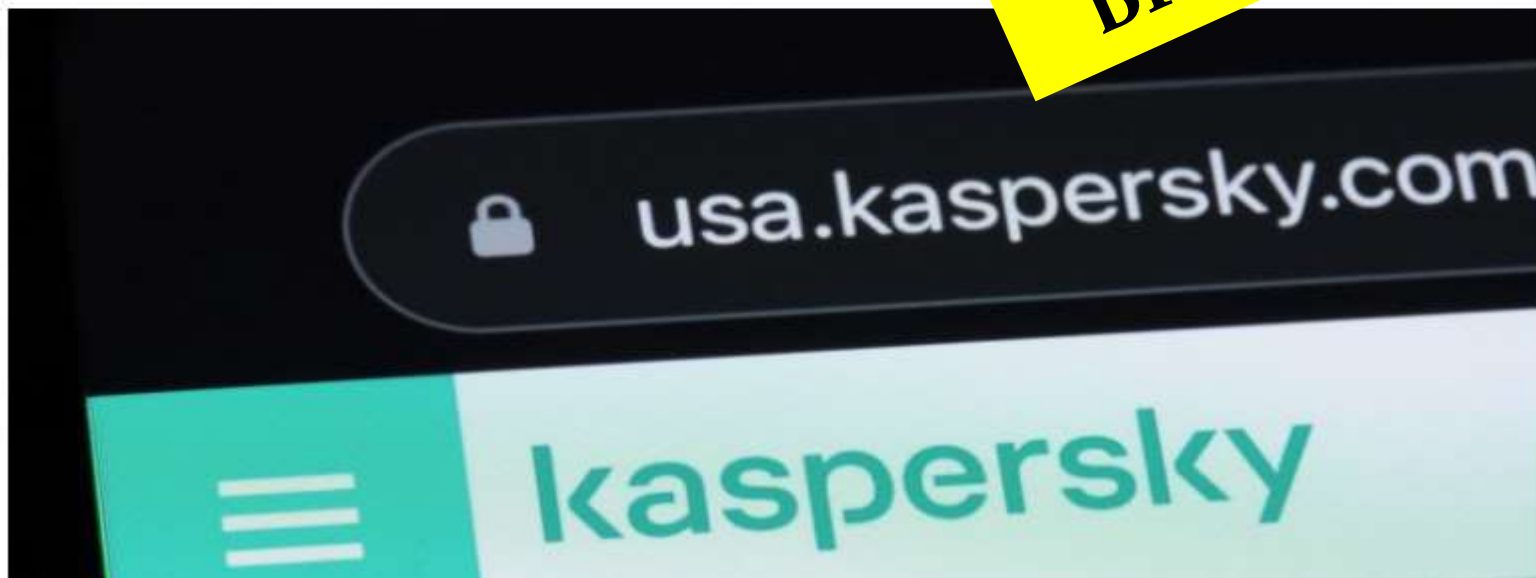

By Kate Irwin

July 16, 2024

Breaking News

<https://www.pcmag.com/news/kaspersky-shutting-down-us-operations-following-nationwide-ban>

- If asked, I would say the Kaspersky products are comparable to Huawei products

kaspersky

≈

Stewart Bruce

- I used Kaspersky some years ago
- I bought a three-year membership deal
- After the first year, they kept asking me to renew my annual membership
- I told them a few times that I have a three-year membership
- At the end of the third year, I dropped them
- At that time, my thinking was if they can't get those small things right, how could they possibly be expected to get the tough stuff right?
- You might say that there are two different offices within Kaspersky - one for admin and one for battling malware; not sure if that convinces me

Elizabeth O'Driscoll

- I have been using Kaspersky software for more than 10 years
- I would rate the protection as excellent
- The software is updated several times each day
- There are several features that make it a very useful package beyond A-V protection
 - a VPN is included
 - monitors hard drive temperatures
 - ad blocking
 - (can be annoying unless you declare websites for which this feature is not to be applied)
- Lab support for any problems is readily available

OPCUG member

- ITFACTORY.CA is an ideal source for the Kaspersky software
- Many other Canadian suppliers have discontinued the product.

KASPERSKY

Kaspersky Antivirus -
Download

★★★★★ (86)

From \$17.95 ~~\$39.95~~

- I used Kaspersky for many years and liked it a lot
- However, I stopped using it as there were issues with it being a Russian product
- I switched to Bitdefender (paid version)
- I have been happy with that as a substitute

OPCUG member

- There is some controversy about Kaspersky Anti-Virus due to various bans and allegations of Russian government ties
- Common advice is to pick a security product or suite and stick with it
- This can be Microsoft Defender or, more often, one of the Gen Digital products
- Gen Digital Inc. is a multinational software company co-headquartered in Tempe, Arizona and Prague, Czech Republic
- The company provides cybersecurity software and services, including: Norton, Avast, AVG, and Avira

- Norton AntiVirus, Norton Small Business, Norton Family, Norton Mobile Security, Norton Online Backup, Norton 360, Norton Utilities and Norton Computer Tune Up
- Avast Antivirus, Avast Premium Security, Avast Cleanup, Avast Secure Browser, and Avast SecureLine VPN – *Avast is is the most popular antivirus vendor on the market*
- AVG AntiVirus, AVG Internet Security, AVG Secure VPN, AVG PC TuneUp, and AVG Driver Updater
- Avira Free Security, Avira Internet Security, Avira Prime and Avira Phantom VPN
- Other products offered include: CCleaner, Recuva, Speccy, Defraggler, HMA, and SONAR.

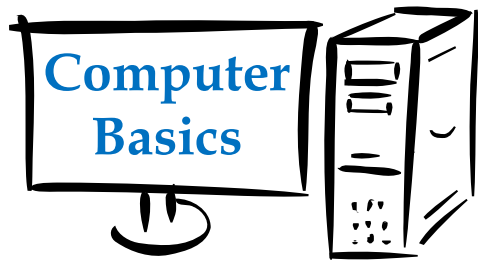

TicketMaster breach

- I use a credit card with a lower spending limit for online purchases; this card was compromised
- I called the customer service number on my credit card and informed my bank about getting that data breach notification from Ticketmaster
- They immediately cancelled my old credit card and will issue me another one even though there were no unfamiliar charges made on the card
- There was no negotiation about this; my bank has a protocol to cancel credit cards affected by the Ticketmaster breach

OPCUG member

- Although new purchases cannot be made on that old card, I can still receive any refunds that are due
- I recommend that affected Ticketmaster users notify their bank about the data breach and then follow the recommended protocol
- I was given the phone numbers for both Trans Union and Equifax so I could call them to request that an ID alert be put on my file
- I applied for free credit monitoring by Trans Union through Ticketmaster
- It will take a few weeks to process the request so I will contact Trans Union directly to avoid the delay

Clearing the browser cache

- On a web site, received a message
 - *Just a friendly reminder: before reviewing all the improvements we've made, please be sure to clear your browser's cache and/or launch an incognito window on your computer.*
- Why is this necessary?
- How do you “clear the browser's cache”
 - without losing things you actually want
- Should the cache should be cleared regularly?
- Used incognito and new edits showed up

Why would web server suggest that?

- Web browsers all cache content
- If content on website hasn't changed since your last visit
 - no need to download content again
 - you already have a copy locally in the web cache
- *...before reviewing all the improvements we've made...*
 - owner of website indicated there were changes
- Your web browser *should* recognize there are changes and download fresh copies of new pages
- Sometimes, this could go haywire
 - browser thinks it already has the up-to-date content
 - displays cached (old) content

Ways to ensure new content is downloaded

- Clear the browser cache
 - browser must download a new copy of web pages
 - ensures you have the up-to-date content
- Incognito mode
 - a.k.a. *Private* or *InPrivate* window
 - does not use the local cache (reading or writing)
 - forces browser to download up-to-date content

Clear cache

- Menu option will probably be *Delete browser data*
- Be careful not to delete *all* browser data
- Probably don't want to clear
 - cookies, browser history, passwords, etc.
- When you clear the cache
 - clears cached content for *all* web sites you have visited
- Next time you visit any web site, all the content will need to be re-downloaded
- Perplexity AI: *...while caching is generally beneficial for performance, the actual speed difference between cache retrieval and downloading on high-speed connections can vary*

Clear cache

- Chrome
 - kebab menu > Settings > Privacy and security > Delete browsing data
- Edge
 - meatball menu > Settings > Privacy, search, and services > Clear browsing data now
- Brave
 - hamburger menu > Settings > Privacy and security > Delete browsing data
- Opera
 - “O” menu > Settings > Clear browsing data
- Firefox
 - hamburger menu > Settings > Privacy & Security > Cookies and Site Data > Clear Data...

Look for Cached images & files
(or similar)

The screenshot shows the 'Delete browsing data' dialog box in a web browser. The 'Advanced' tab is selected. A 'Time range' dropdown is set to 'All time'. A list of data types to delete is shown with checkboxes:

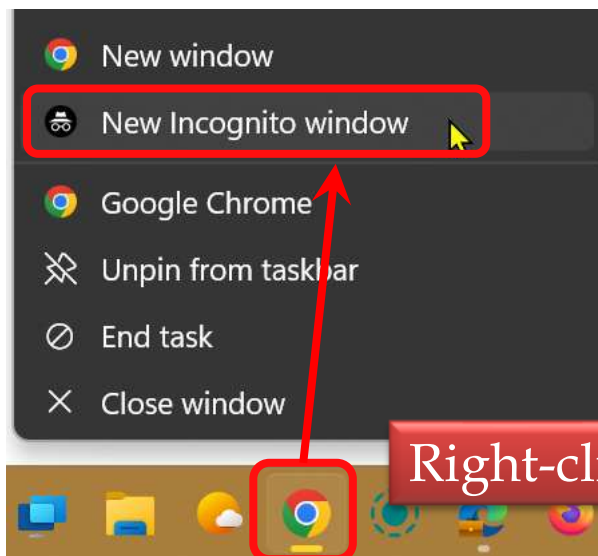

- ☐ Browsing history
15,031 items (and more on synced devices)
- ☐ Download history
1,459 items
- ☐ Cookies and other site data
From 2,405 sites (you'll stay signed in to your Google Account)
- ☒ **Cached images and files**
70.7 MB
- ☐ Passwords and other sign-in data
141 passwords (for ncf.ca, gosselinphoto.ca, and 139 more, synced)
- ☐ Autofill form data

At the bottom right, there are 'Cancel' and 'Delete data' buttons.

Incognito mode

- Safest if you don't want *anything* deleted
 - does not use the local cache (reading or writing)
- Q&A 2024-04-17 *Is Incognito mode useful?*
 - https://opcug.ca/qa_recordings/20240417_PowerPoint.pdf
- *Private Browsing: Is it all it's cracked up to be?*
 - <https://opcug.ca/Articles/2311NEWS.pdf>

Right-click icon for browser

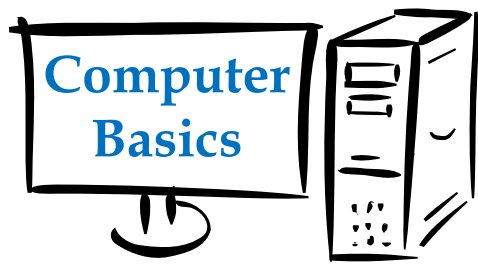

From within browser

Chrome, Edge, Brave, Opera

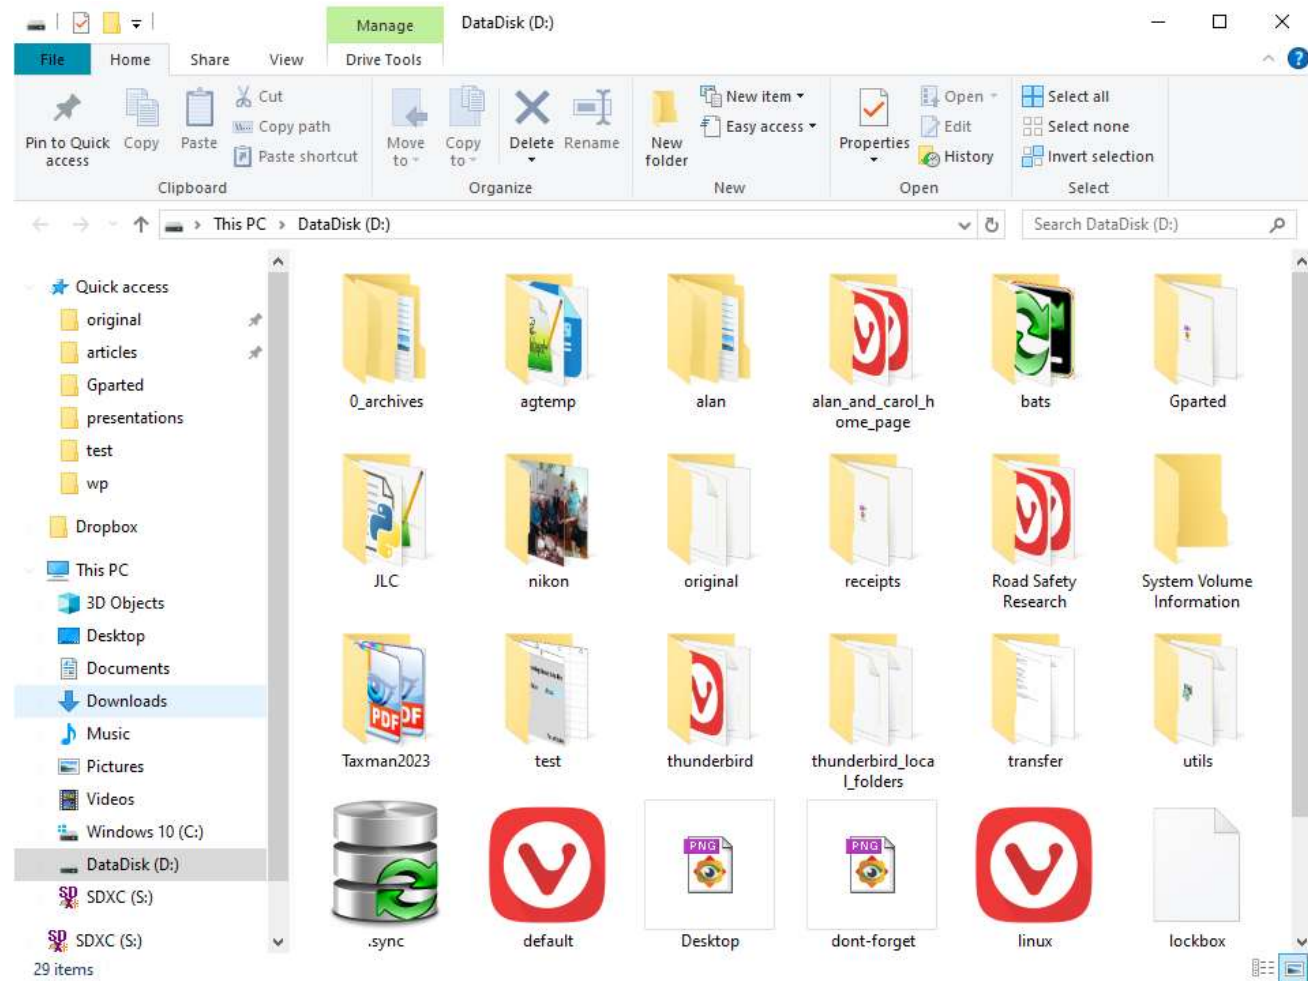

- *Ctrl-Shift-N*

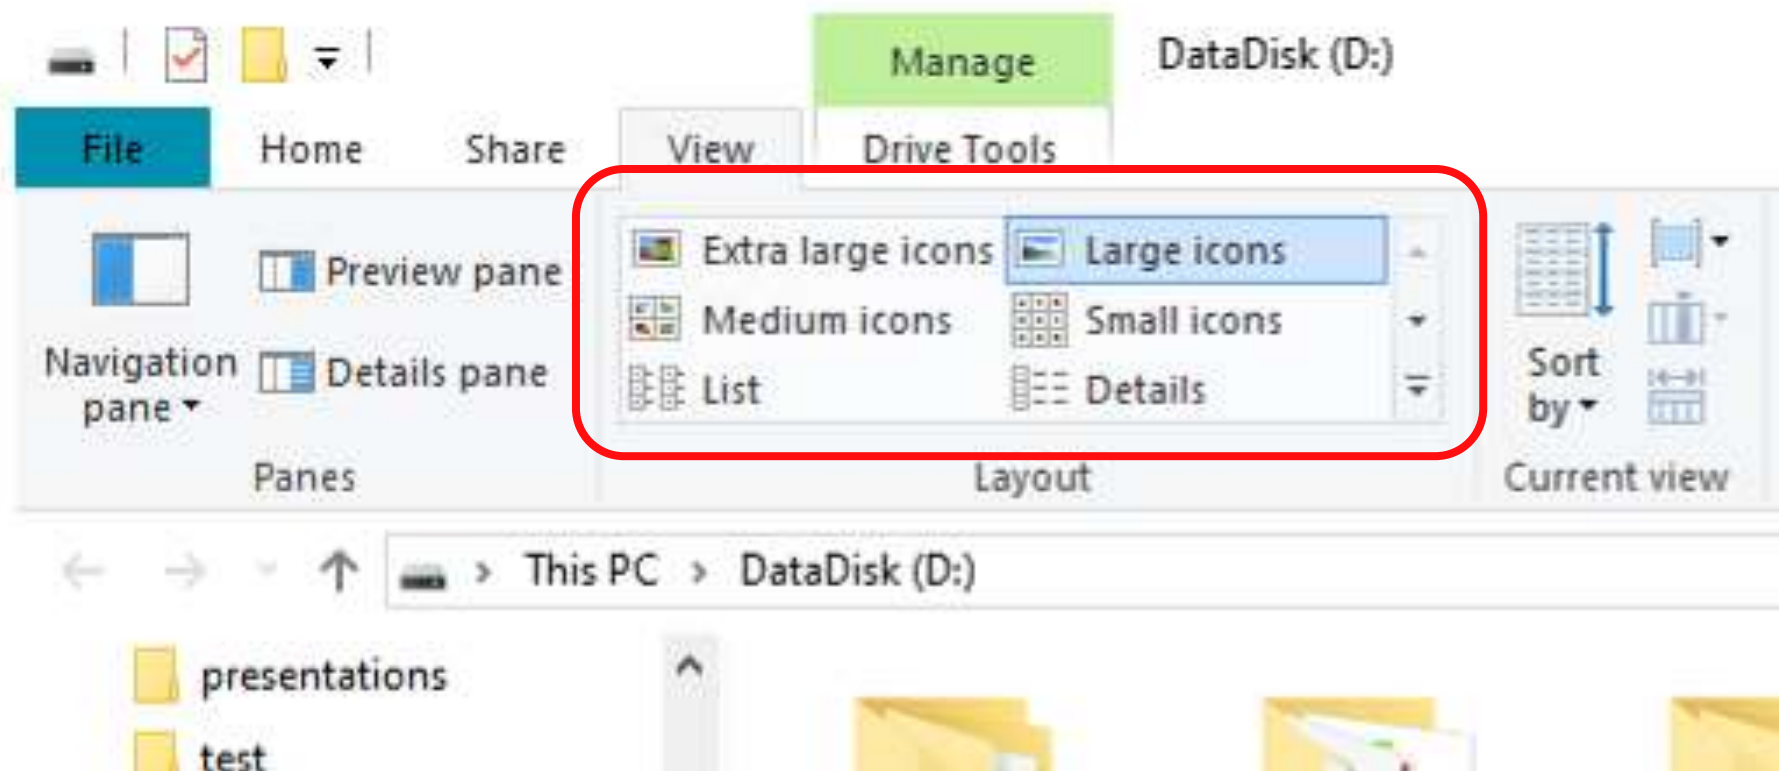

Firefox

- *Ctrl-Shift-P*

Customizing File Explorer

File Explorer window titled "DataDisk (D:)" with standard Windows window controls (minimize, maximize, close) in the top right corner.

The ribbon at the top includes "File", "Home", "Share", "View", and "Drive Tools". The "View" tab is active, showing options for "Panels" (Navigation pane, Preview pane, Details pane), "Layout" (Extra large icons, Medium icons, Large icons, Small icons, List, Details), "Current view" (Sort by), and "Show/hide" (Item check boxes, File name extensions, Hidden items, Hide selected items, Options).

The "Large icons" option in the "Layout" group is highlighted with a red rectangle.

The address bar shows the path "This PC > DataDisk (D:)" and a search box labeled "Search DataDisk (D:)" with a magnifying glass icon.

The left sidebar displays the navigation pane with the following items: presentations, test, wp, Dropbox, This PC, 3D Objects, Desktop, Documents, Downloads, Music, Pictures, Videos, Windows 10 (C:), DataDisk (D:), SDXC (S:), and another SDXC (S:). The "DataDisk (D:)" item is selected and highlighted.

The main area displays a grid of 15 items (folders and files) in large icon view. The items are:

- 0_archives
- agtemp
- alan
- alan_and_carol_home_page
- bats
- Gparted
- JLC
- nikon
- original
- receipts
- Road Safety Research
- System Volume Information
- Taxman2023
- test
- thunderbird

At the bottom left, it says "30 items".

File Explorer window showing the contents of DataDisk (D:).

The ribbon includes tabs for File, Home, Share, View, and Picture Tools. The View tab is active, showing options for Navigation pane, Preview pane, Details pane, and various view settings.

The View tab settings are as follows:

- Navigation pane: Preview pane, Details pane
- Layout: Extra large icons, Large icons, Medium icon, Small icons, Details (selected), List
- Current view: Sort by, Sort order, Sort type
- Show/hide: Item check boxes, File name extensions, Hidden items, Hide selected items, Options

The address bar shows the path: This PC > DataDisk (D:).

The left sidebar shows the following locations:

- This PC
- 3D Objects
- Desktop
- Documents
- Downloads
- Music
- Pictures
- Videos
- Windows 10 (C:)
- DataDisk (D:)
- SDXC (S:)
- SILICON16GB (U:)
- SDXC (S:)
- SILICON16GB (U:)
- Network

The main pane displays a list of files and folders in DataDisk (D:).

Why the cassowary is the world's most dangerous bird

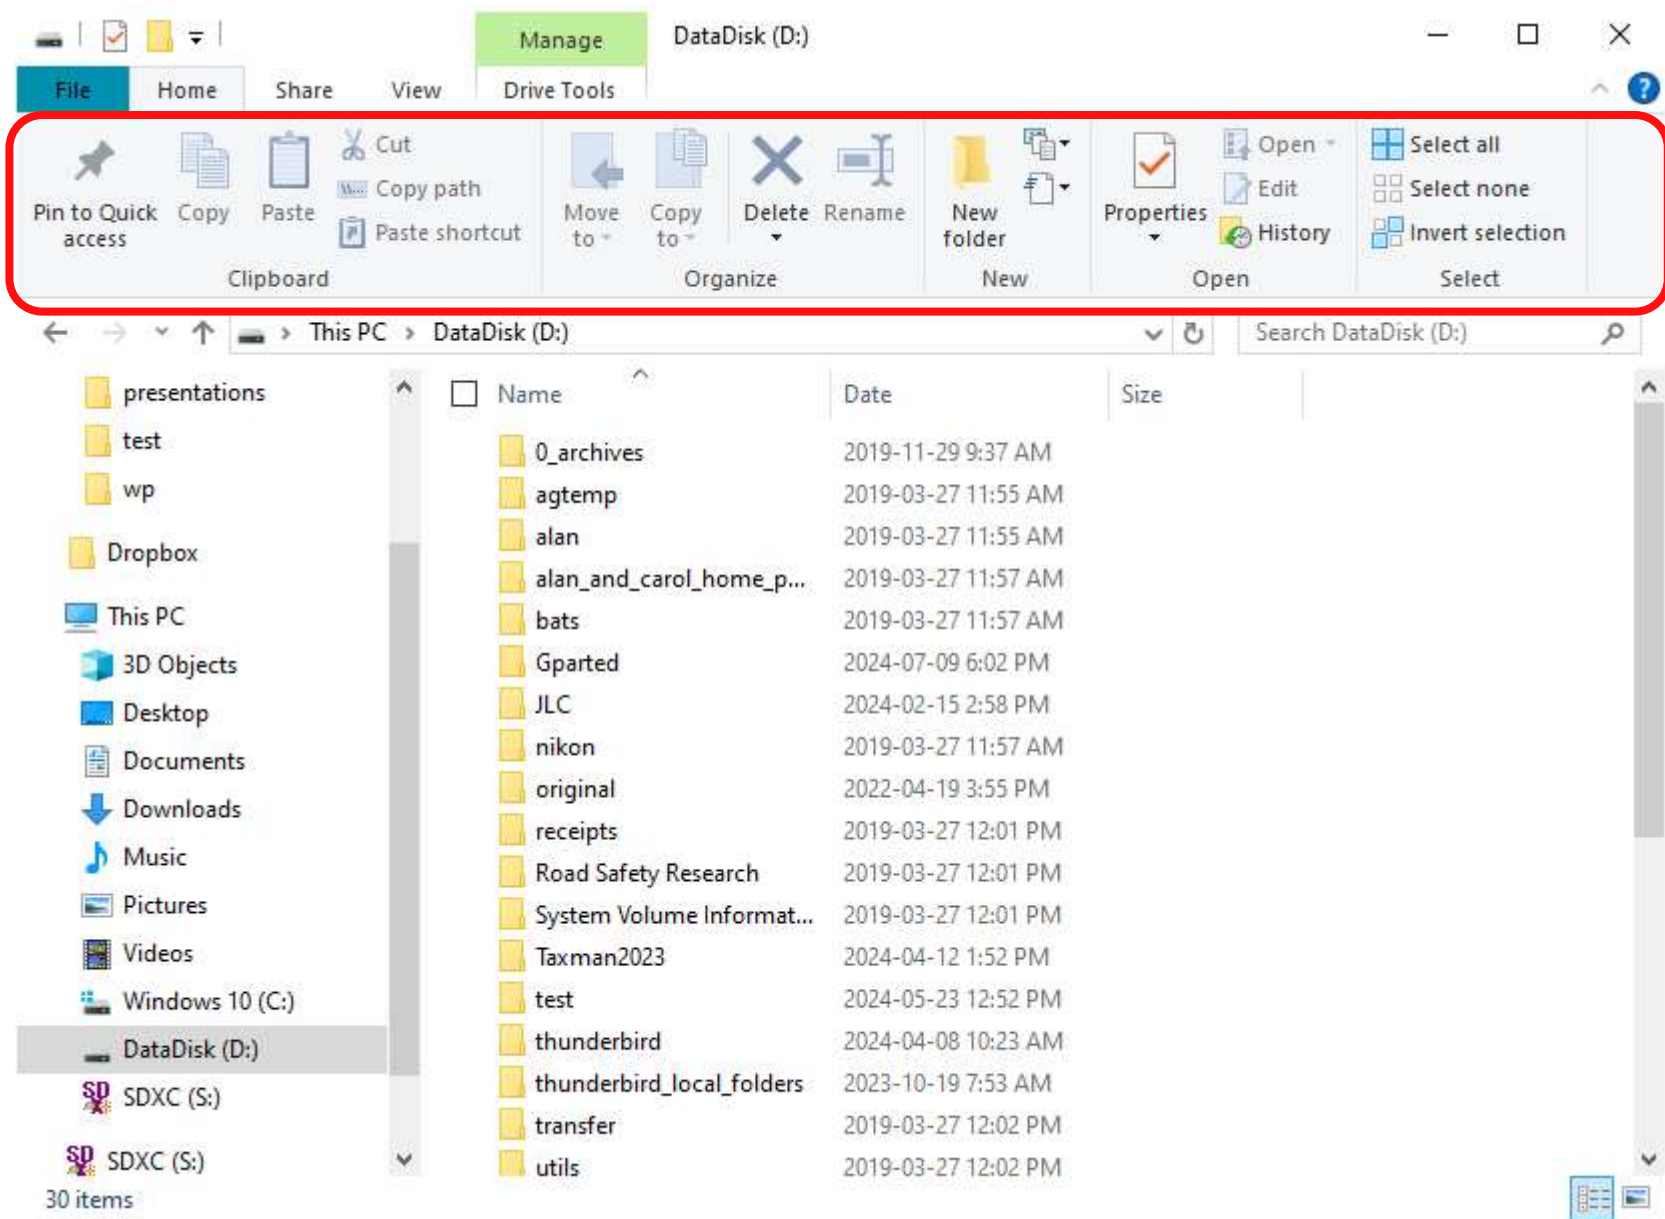

By Adam Millward | Published 15 April 2019

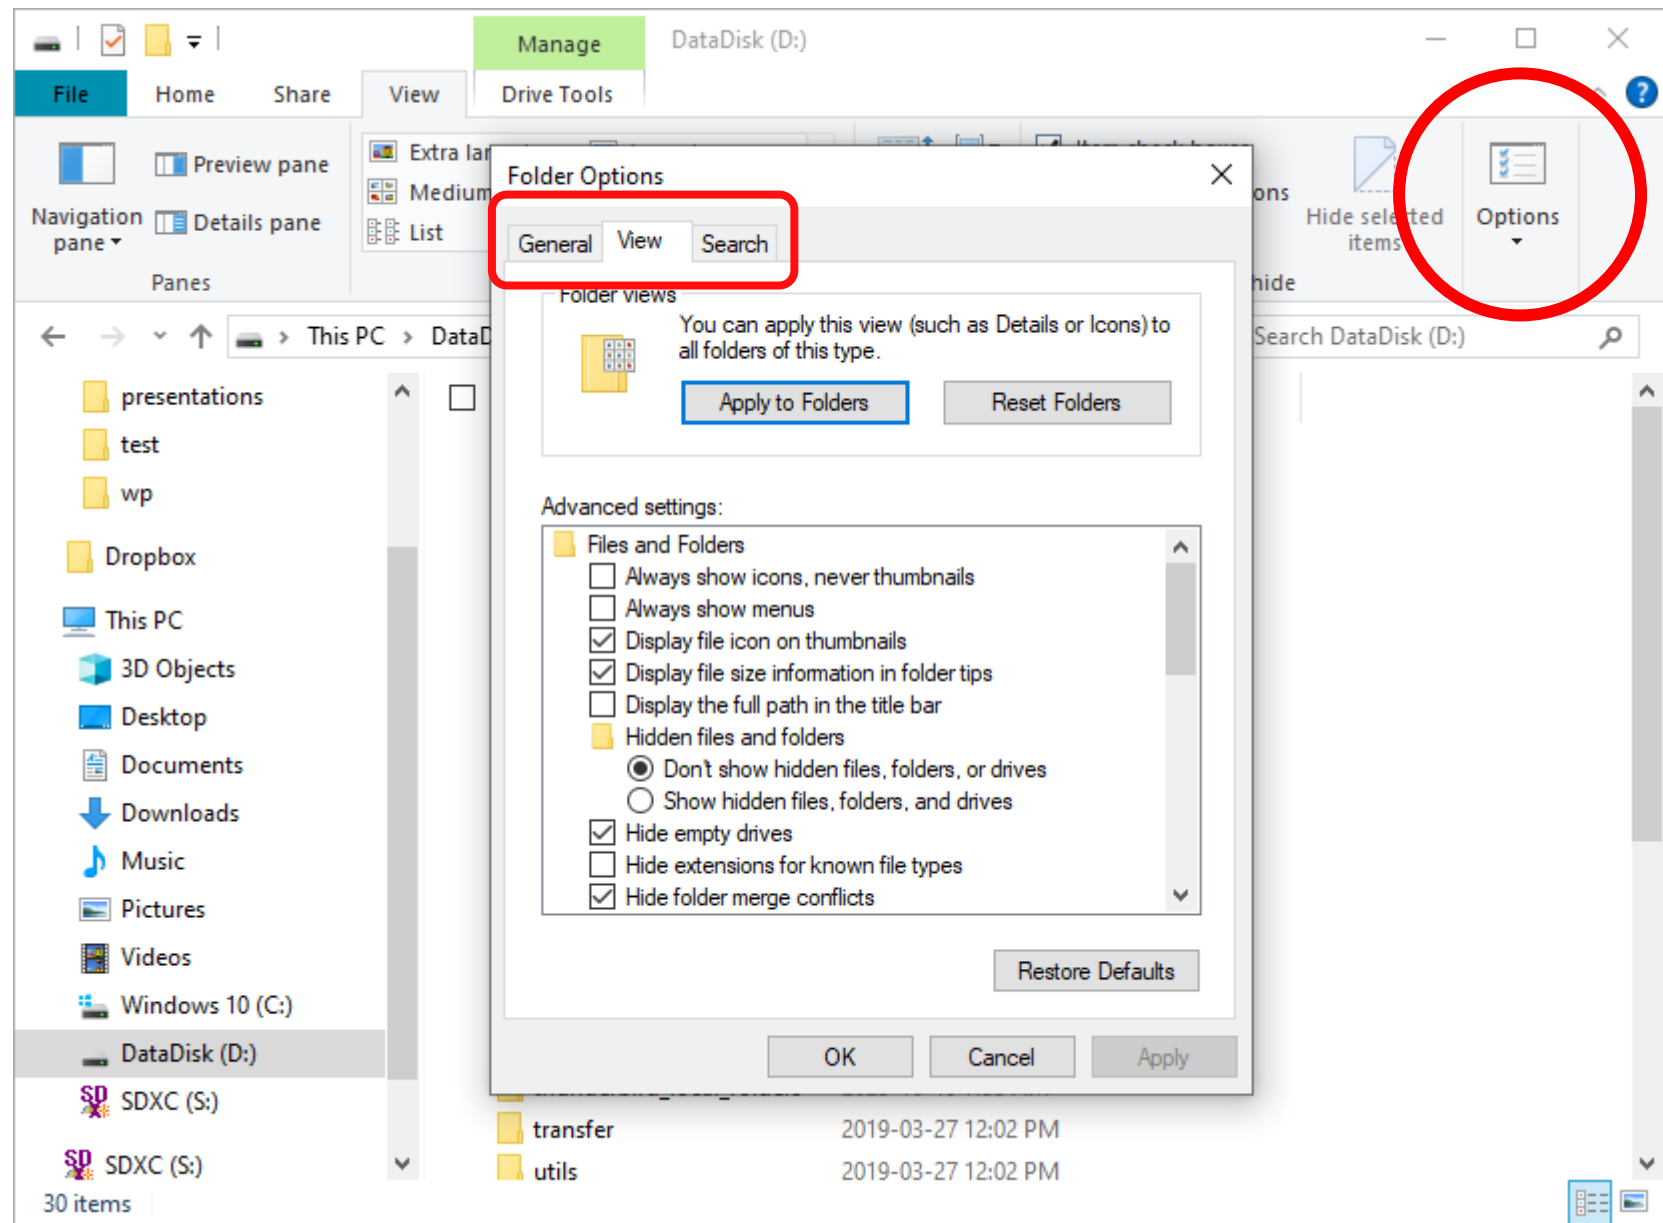

Southern Cassowary
Up to 2m, 70 kg

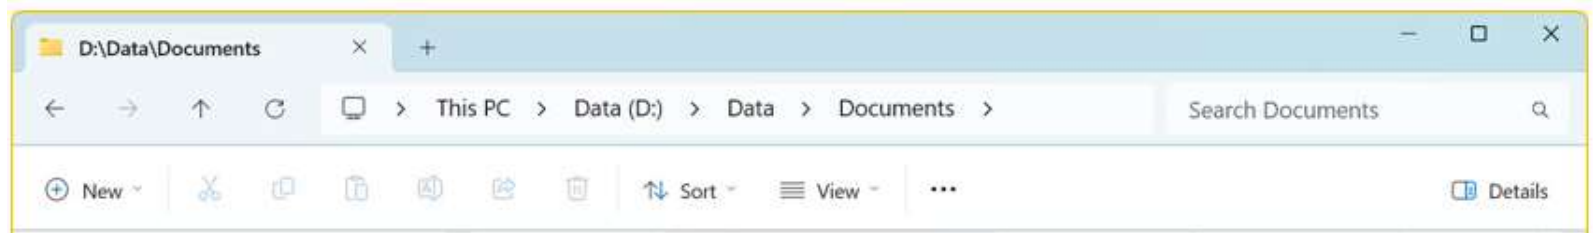

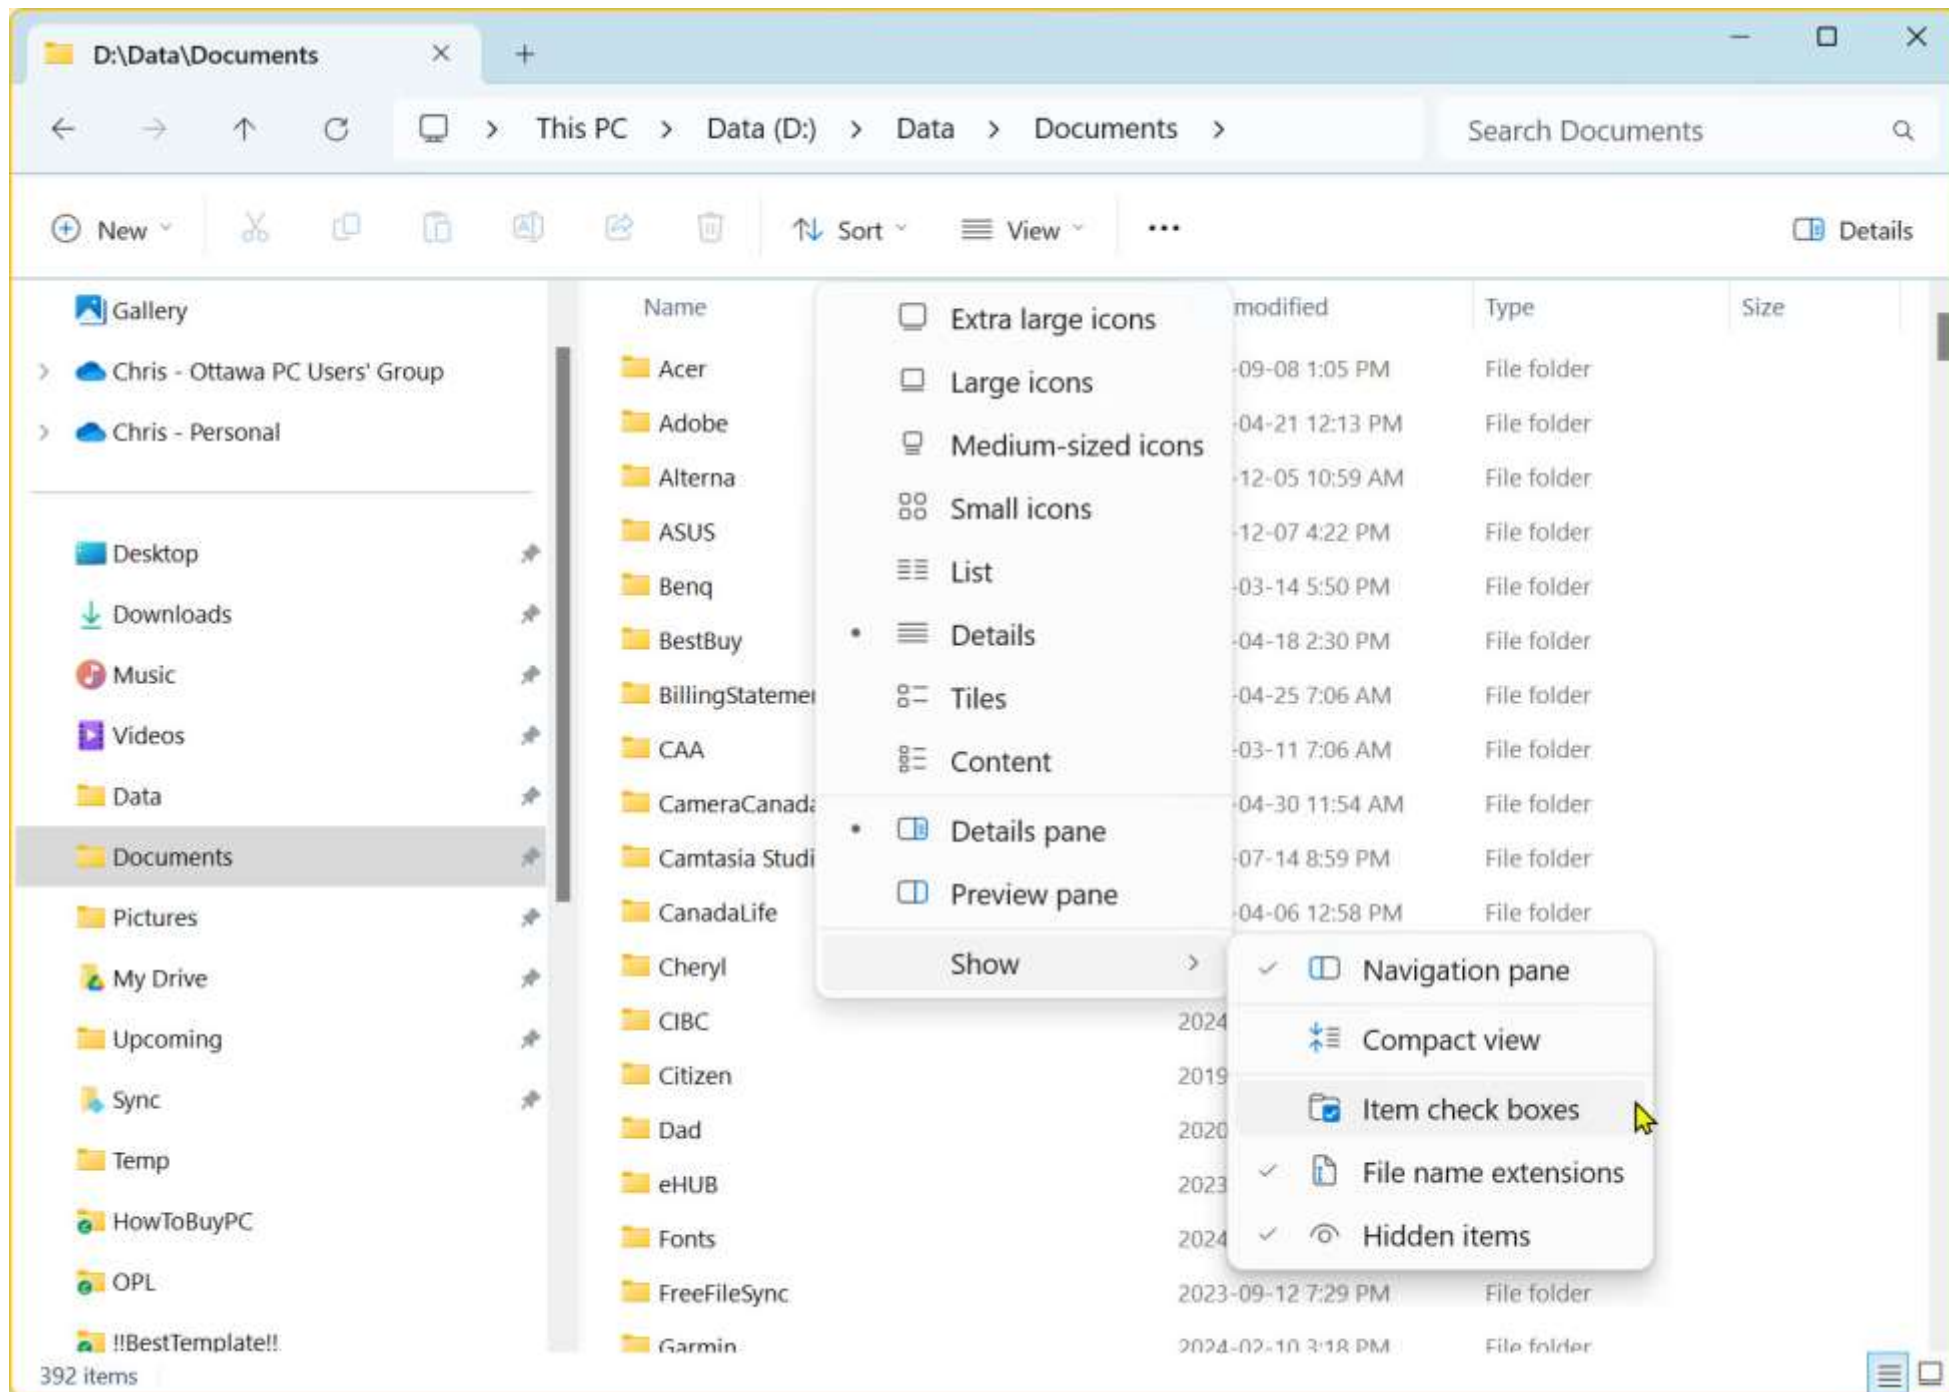

Windows 11 has done what?!

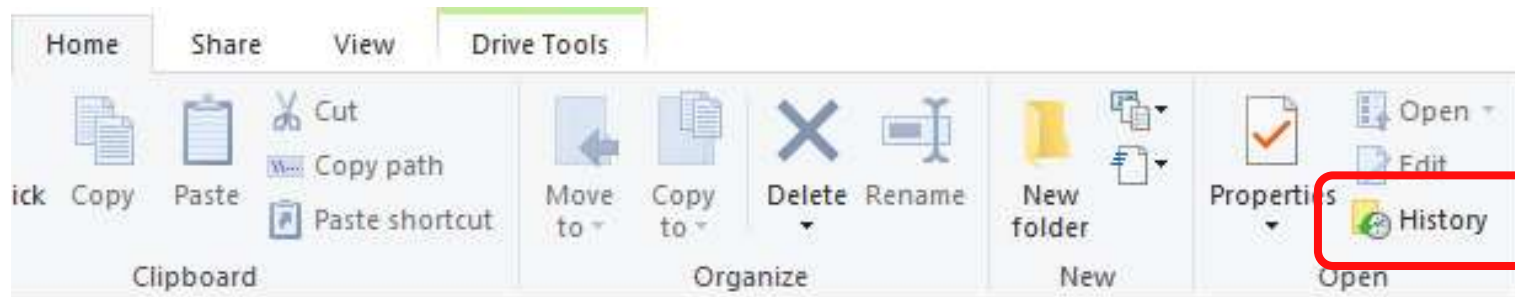

- Windows 11 has introduced some major wrinkles - mainly by removing the ribbon!
- Or at least it is a very abbreviated version of the ribbon
- Some options are now under multi-level menus

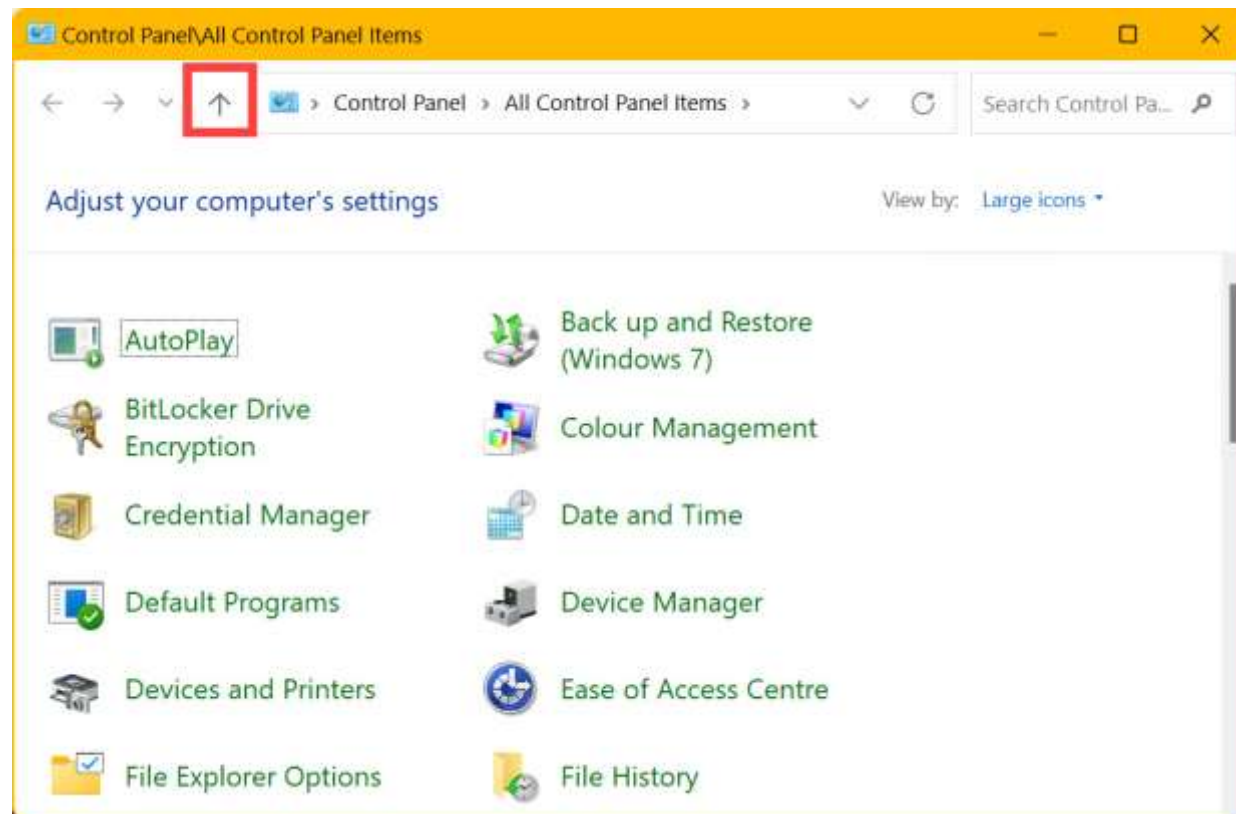

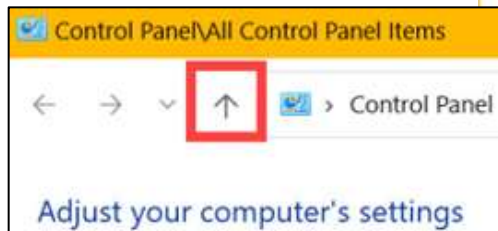

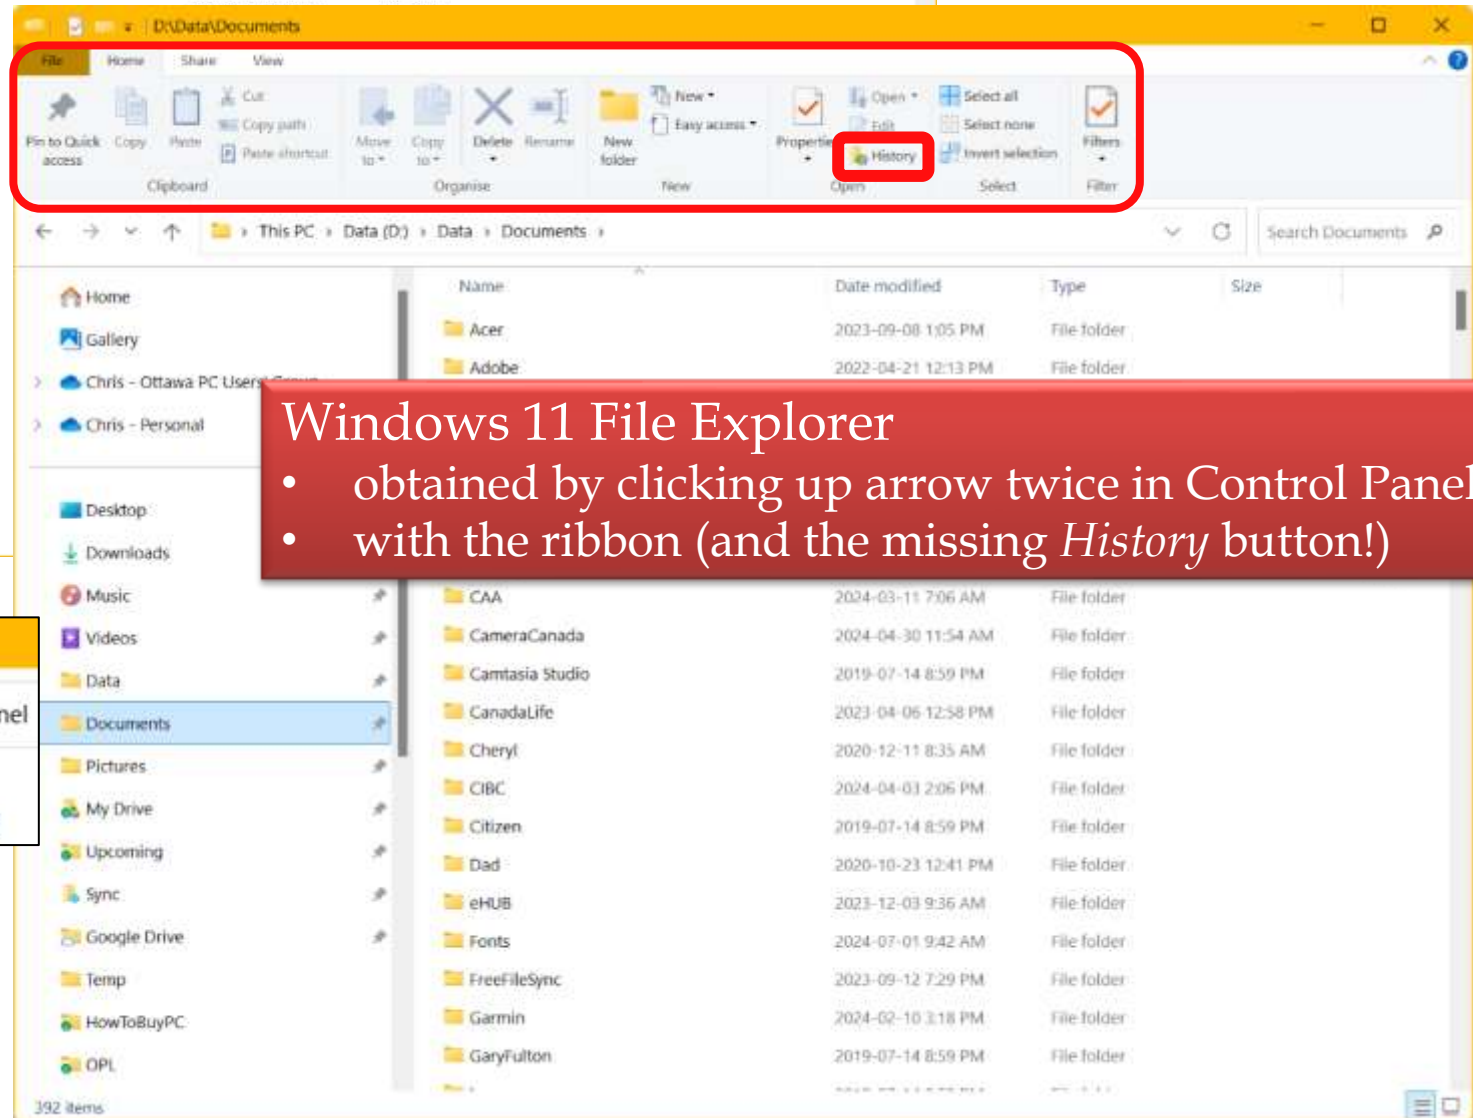

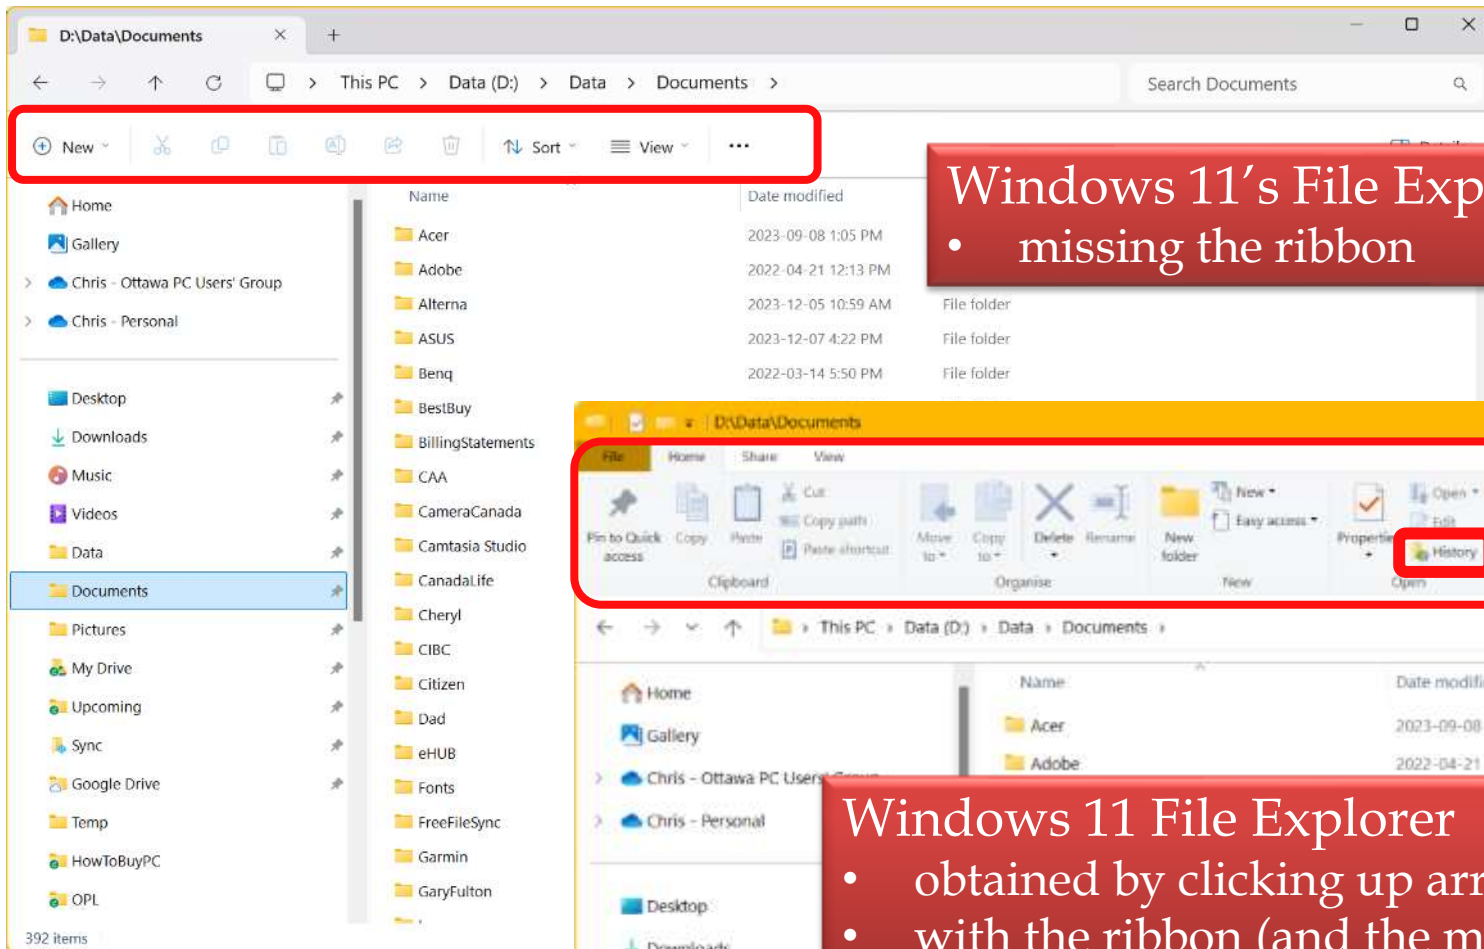

- Some options that can only be had through the ribbon are now totally missing from File Explorer
- One example is access to File History - absolutely needed to recover deleted files in File History

Windows 10 > File Explorer > Home tab > Open group > History

- For Windows 11 users who still want the ribbon in File Explorer:
 - go to Control Panel
 - hit the up arrow at the top twice
 - this will display the ribbon in File Explorer

This will work until Microsoft realizes they made a mistake in making it too easy for people and takes this away!

cell phone

Now, Let's
review and
recap some key
details

HeyYep.com

HeyYep.com

Quick Review

- No login or email required
- Completely free to use
- No time limits
- Works on PCs, Androids, iPhones, & Macs
- Works “cross platform” Android & IOS etc.
- No downloads required
- Supports up to 12 people simultaneously
- Instant video chat with a simple link

Yep does not require users to create accounts or provide personal information to use its services. This approach significantly reduces the amount of personally identifiable information.

Yep explicitly states: It does not track or store user data. This includes not storing call logs, video recordings, or any other form of user activity.

HeyYep.com

Thank you
