PRODUCT REVIEW

Renaming Multiple Files by Alan German

Renaming one file in Windows is simple; just click on the file in File Explorer to highlight the name which can then be typed over or edited as desired. But, what if there are 12 files (or 1200), with names like 20241019_103224.jpg, that need to be renamed in a logical sequence? Sure, you could edit them one-by-one but a much more efficient method is to use a purpose-built utility program that can apply a naming template to all the slides automatically. Enter Advanced Renamer, a single-minded program from software developer Kim Jensen, that makes renaming multiple files a breeze.

When downloaded and installed, running the program displays a main screen that initially may seem a little daunting. However, the first topic in the online user guide is *Getting Started* and this provides simple, clear instructions, together with an annotated screenshot, of the four-step process to batch rename a group of files.

Firstly, the files to be renamed can be selected by clicking on the *Green plus sign/File* menu item under *Batch Mode*. This loads a standard file-browser window where multiple files can be selected for processing.

Next, selecting *New name* from the *Add batch method* area on the lower-left side of the window provides a text box where a template for the new file name can be developed. Text can be typed into this box and supplemented by any of a number of pre-defined entries. For example, one commonly-used construct is to add the entry *<Inc Nr>* - *Incrementing number* in order to include sequence numbers in the file names.

In the example shown in Figure 1, the initial file name, 20241019_103224.jpg, has been renamed to Mer-Bluee-01.jpg and this format has been automatically applied to the remaining files that have been selected for renaming.

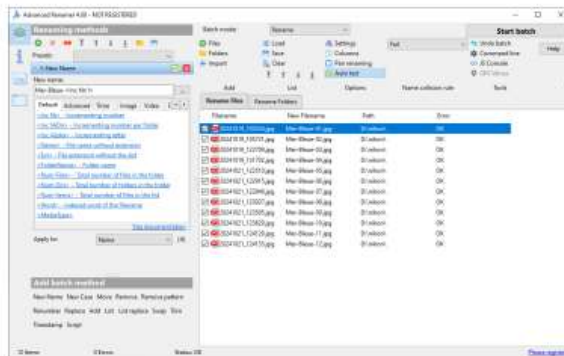

Figure 1. Files renamed using Advanced Renamer

The third, very useful, step is to review the set of new file names that are now displayed in the main program window. The template can be adjusted should the previewed results not be precisely those desired.

Finally, the *Start batch* control button is pressed to initiate the renaming process.

As its name suggests, Advanced Renamer has many more complex features, including the ability to change the case of text, use date and time information, conduct partial naming using search patterns, use music file tags and digital image metadata, and copying or moving files and folders. These advanced options provide a range of exceptionally flexible file and folder renaming constructs.

The program is available for Windows (64-bit only) and Mac computers. The User Guide is very comprehensive with clear descriptions of the available features together with a number of useful examples. And, while the program's interface may initially seem somewhat complex, it is actually very easy to perform a simple batch file renaming process for a specific group of files which is the most likely requirement for the majority of users.

Bottom Line

Advanced Renamer (Freeware)
Version 4.08

File Explorer window showing the contents of the folder **D:\nikon\Limpkin**.

The ribbon includes tabs: **File**, **Home**, **Share**, **View**, and **Manage** (active). The **Picture Tools** tab is also visible.

The ribbon commands are organized into groups:

- Clipboard:** Pin to Quick access, Copy, Paste, Cut, Copy path, Paste shortcut.
- Organize:** Move to, Copy to, Delete, Rename.
- New:** New item, Easy access, New folder.
- Open:** Properties, Open, Edit, History.
- Select:** Select all, Select none, Invert selection.

The address bar shows the path: **This PC > DataDisk (D:) > nikon > Limpkin**. The search bar contains **Search Limpkin**.

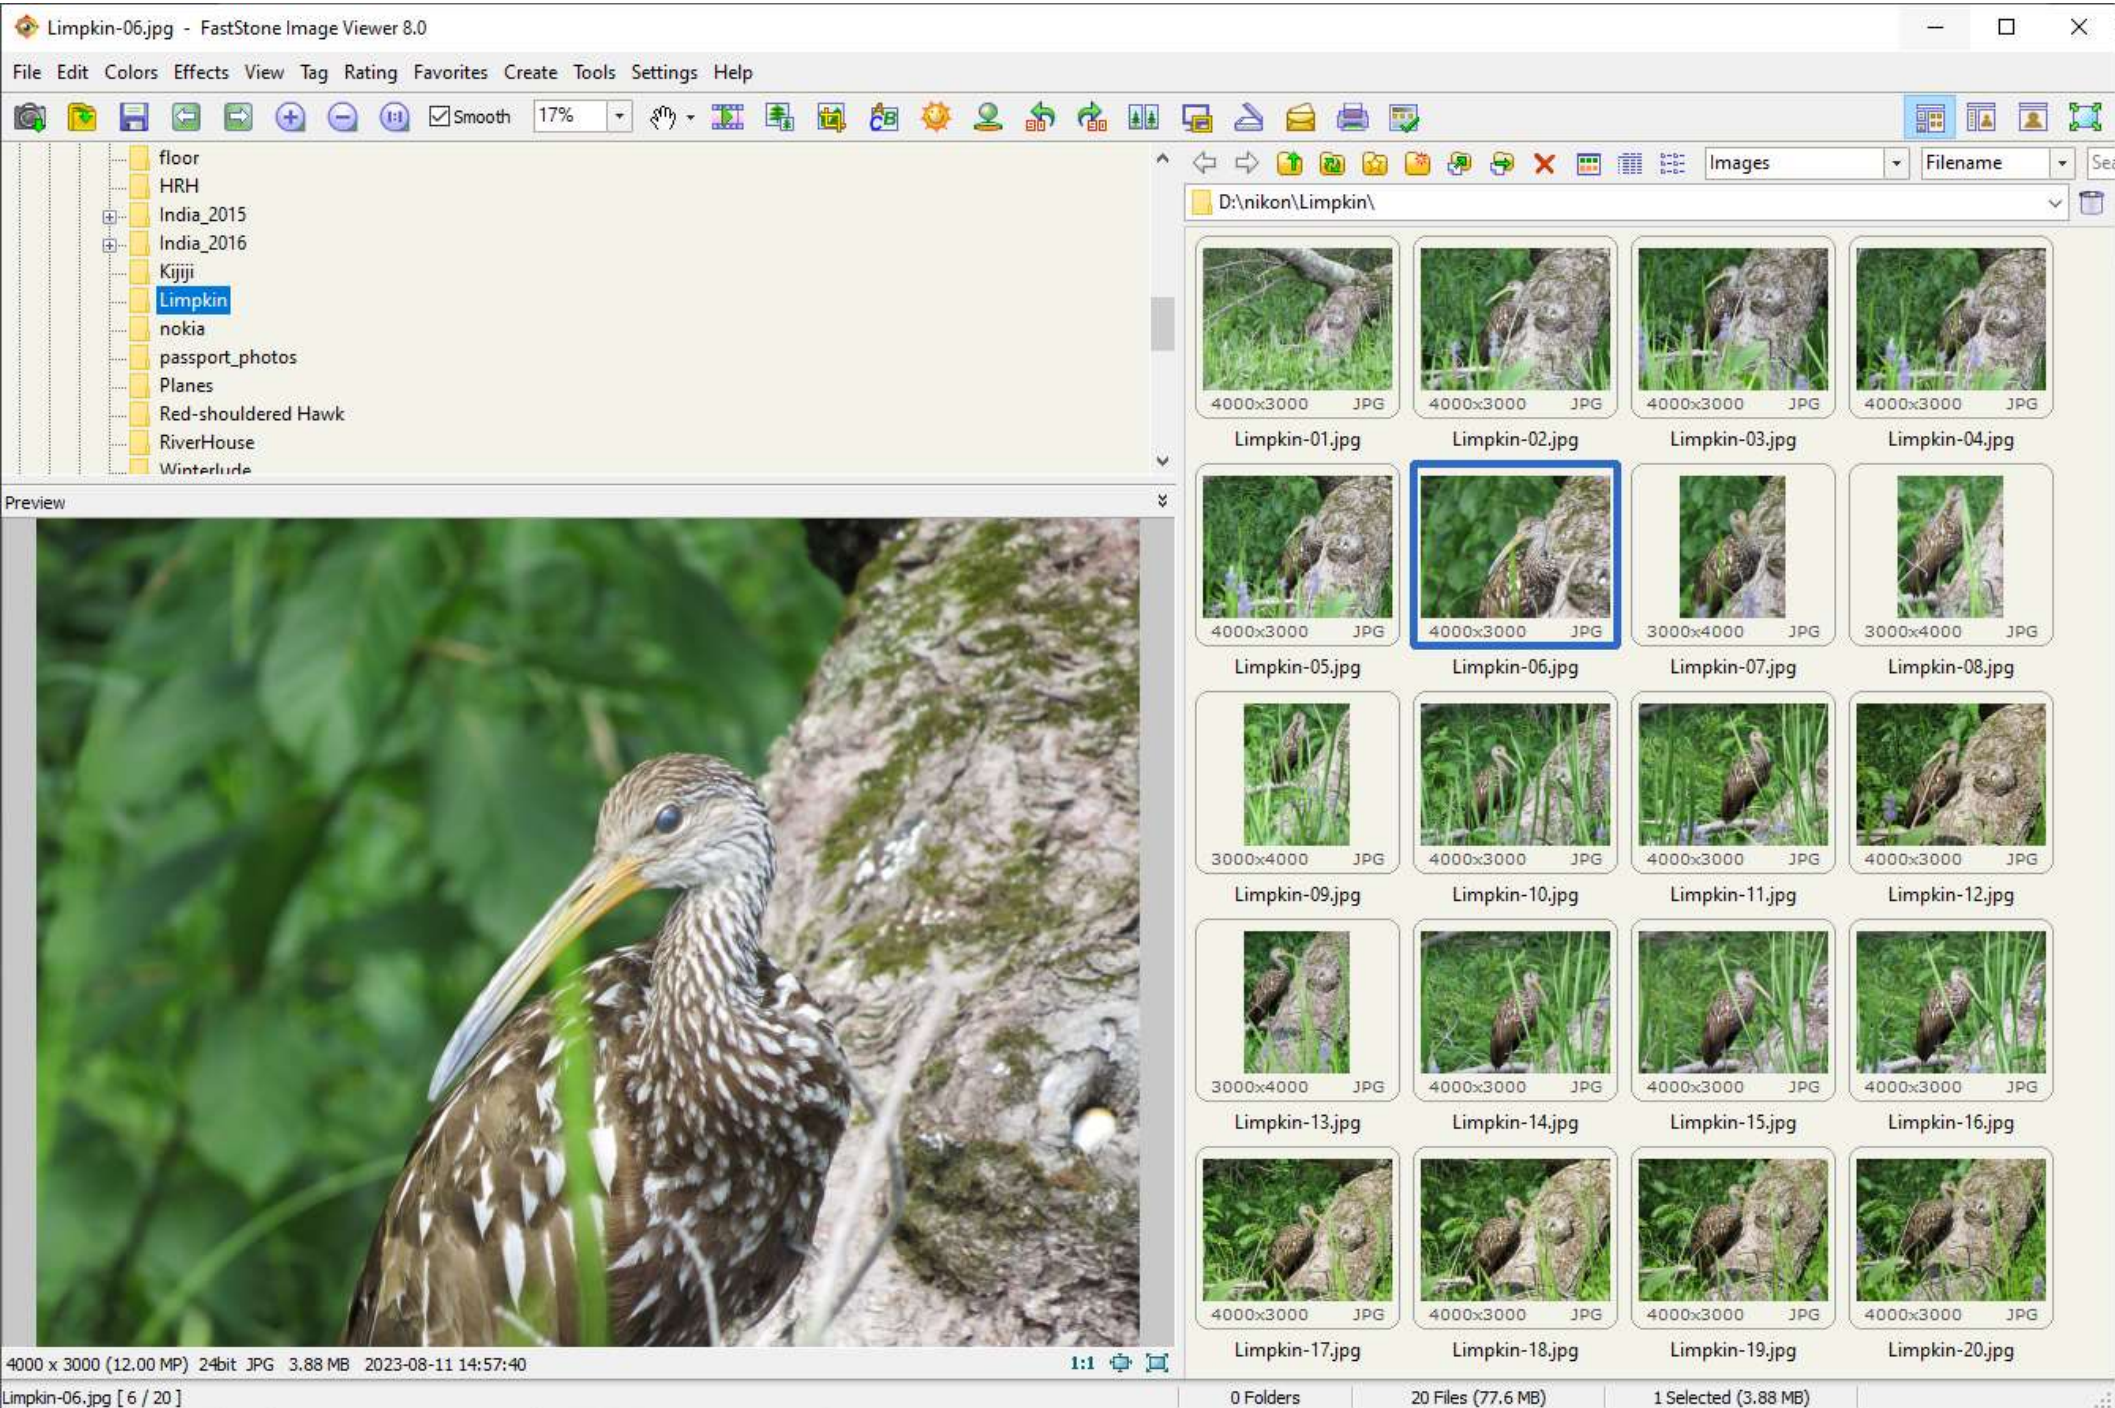

The left sidebar shows the navigation pane with the following items:

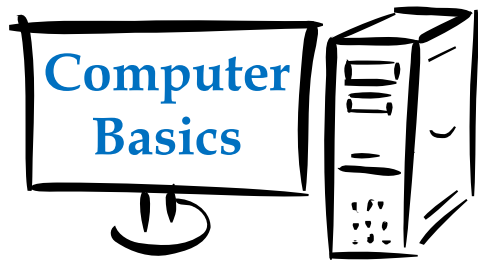

- original
- presentations
- qa_shortcode
- wp
- Dropbox
- This PC
- 3D Objects
- Desktop
- Documents
- Downloads
- Music
- Pictures
- Videos
- Windows 10 (C:)
- DataDisk (D:)** (selected)
- My Book04 (M:)
- 64GBSDcard (S:)

The main pane displays a list of 19 JPEG files, sorted by Name. The columns are **Name**, **Date**, and **Size**.

Name	Date	Size
Limpkin-01.jpg	2023-08-11 2:53 PM	4,853 KB

Peering into your data

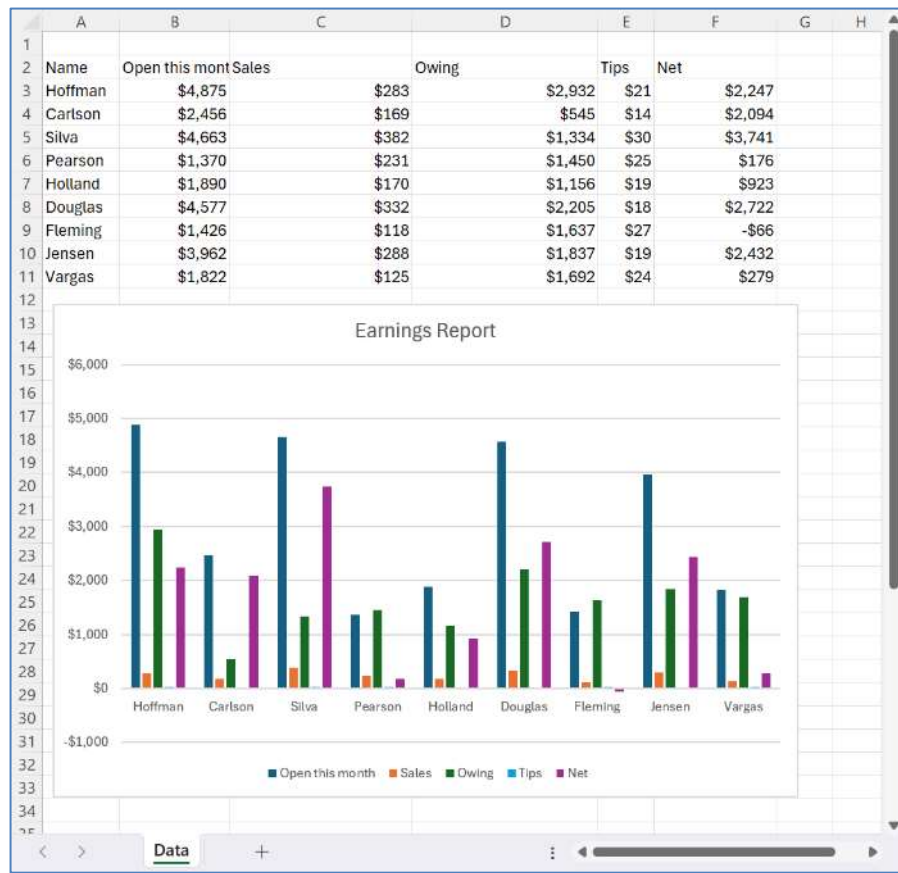

- Excel allows for a large amount of data
 - multiple data types
 - numbers, text, charts, pivot tables, etc.
 - much more than can be viewed on a single screen
- Difficult to
 - work in one section and
 - see the effect in another section
- For example:
 - data and
 - chart visualizing the data

Don't work in Excel?
• keep watching anyways!

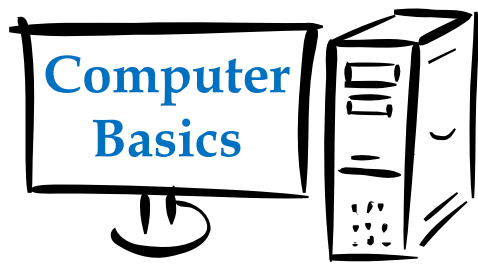

Data table and chart on single sheet

- convenient to see both **data** and **chart** at once
- may need to frequently move **chart** as you add **data**

- as you move through **data**, **chart** may not be visible
- can't see effect in **chart** of changed **data**

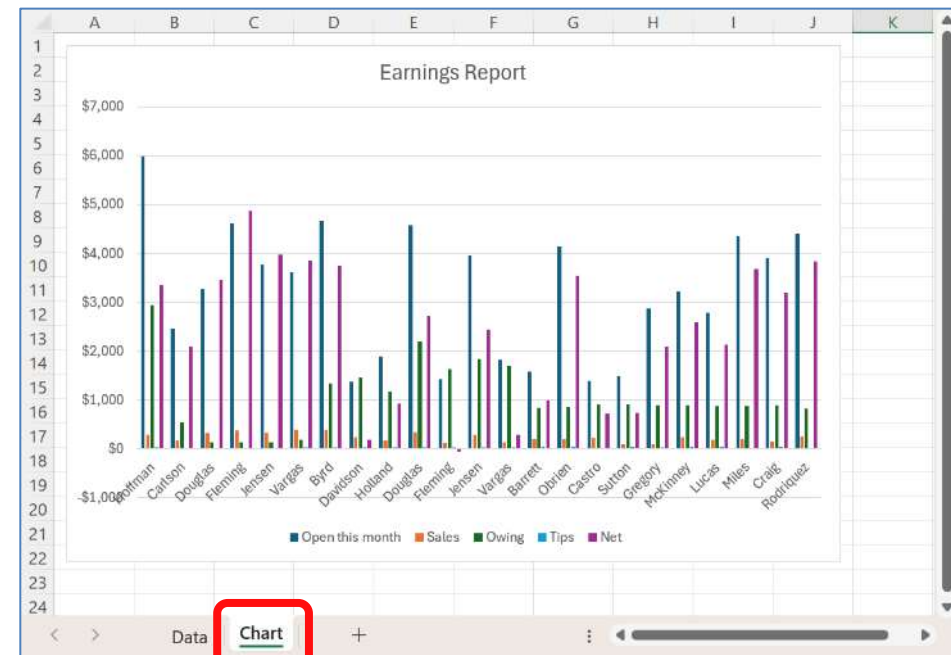

Data and chart on separate sheets

Click tab you want to view

- no need to move chart as you add rows
- no need to scroll to find chart

	A	B	C	D	E	F	G	H
1	Name	Open this mont Sales	Owing	Tips	Net			
2	Hoffman	\$5,985	\$283	\$2,932	\$21	\$3,357

5	Fleming	\$4,614	\$376	\$134	\$13	\$4,869		
6	Jensen	\$3,759	\$324	\$128	\$13	\$3,968		
7	Vargas	\$3,615	\$395	\$178	\$20	\$3,852		
8	Byrd	\$4,663	\$382	\$1,334	\$30	\$3,741		
9	Davidson	\$1,370	\$231	\$1,450	\$25	\$176		
10	Holland	\$1,890	\$170	\$1,156	\$19	\$923		
11	Douglas	\$4,577	\$332	\$2,205	\$18	\$2,722		
12	Fleming	\$1,426	\$118	\$1,637	\$27	-\$66		
13	Jensen	\$3,962	\$288	\$1,837	\$19	\$2,432		
14	Vargas	\$1,822	\$125	\$1,692	\$24	\$279		
15	Barrett	\$1,578	\$198	\$828	\$38	\$986		
16	Obrien	\$4,151	\$196	\$856	\$42	\$3,533		
17	Castro	\$1,393	\$219	\$900	\$11	\$723		
18	Sutton	\$1,487	\$103	\$899	\$41	\$732		
19	Gregory	\$2,870	\$103	\$892	\$19	\$2,100		
20	McKinney	\$3,212	\$227	\$880	\$41	\$2,600		
21	Lucas	\$2,780	\$175	\$872	\$44	\$2,127		
22	Miles	\$4,349	\$193	\$873	\$12	\$3,681		
23	Craig	\$3,897	\$139	\$889	\$44	\$3,191		
24	Rodriguez	\$4,337	\$249	\$818	\$13	\$3,841		

But...

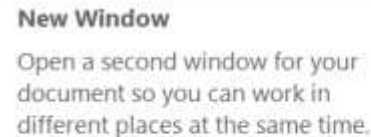

- while viewing **data**, can't see **chart**
- while viewing **chart**, can't see **data**

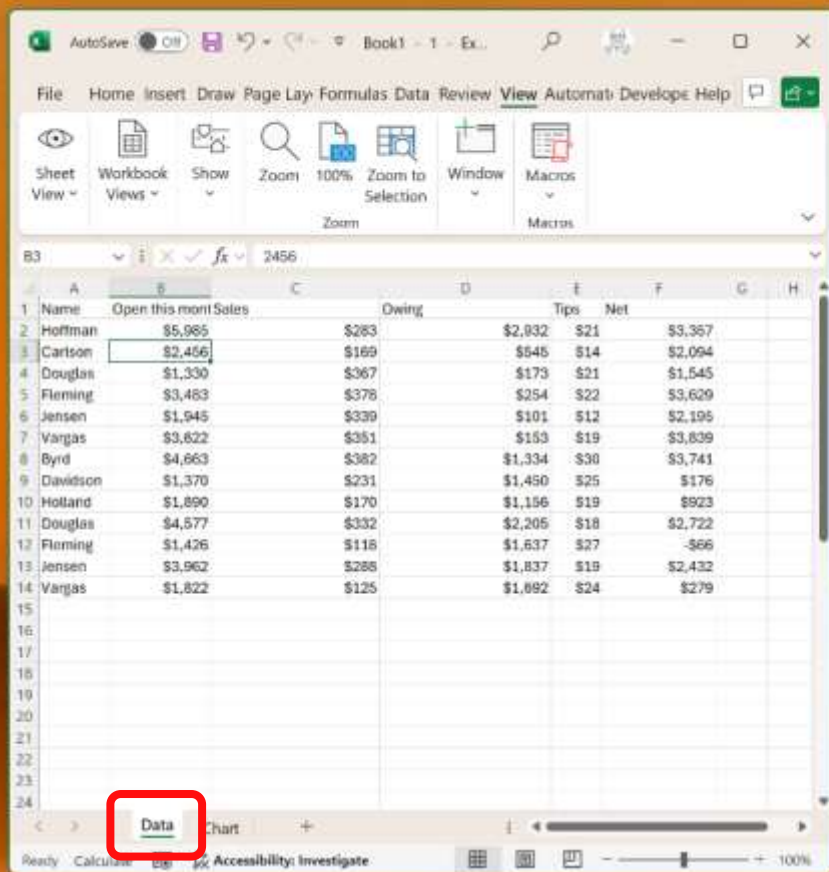

You could see both tabs at once?

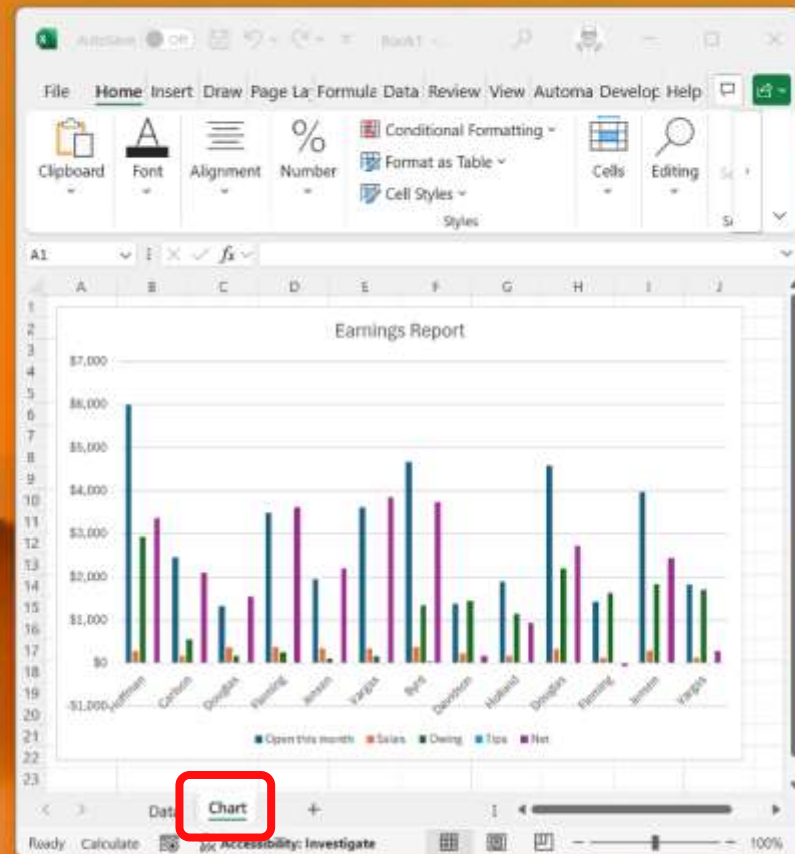

You can!

- View tab in ribbon
- Window section
- New Window

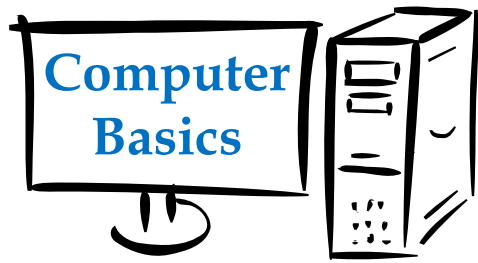

Select **Data** tab in one window...

...and **Chart** tab in other

Two windows into **same** workbook

- can choose different tab in each window
- as data changes in data tab, immediately see change in chart
- **they are the same workbook**
 - just different views into same information

Can I do this in other programs?

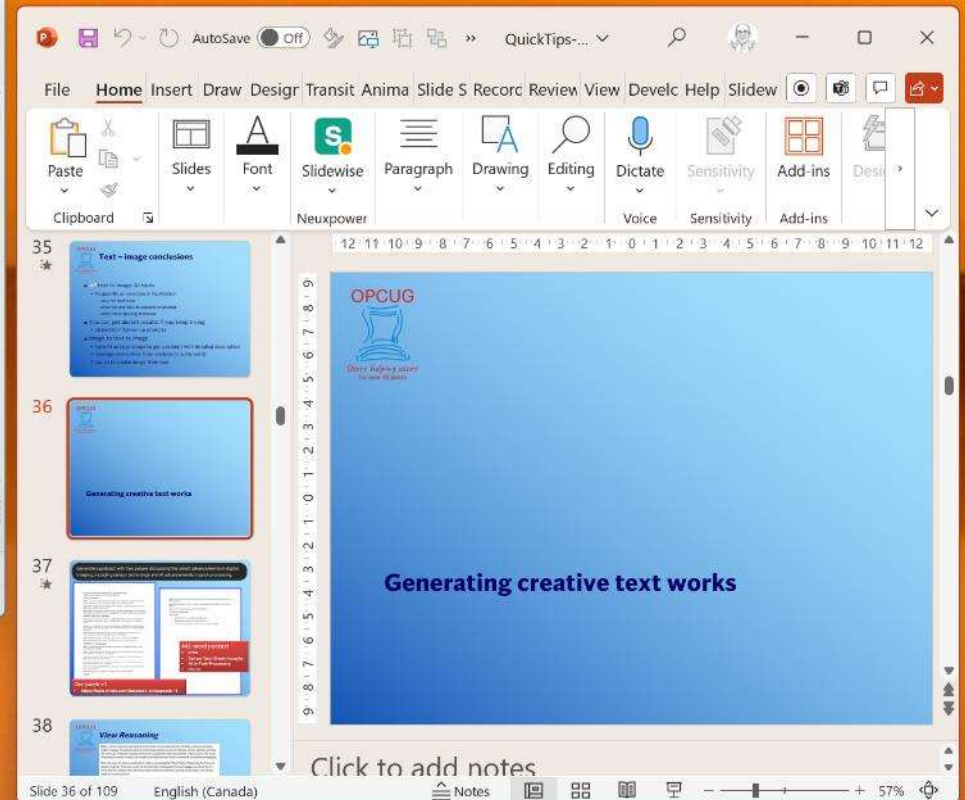

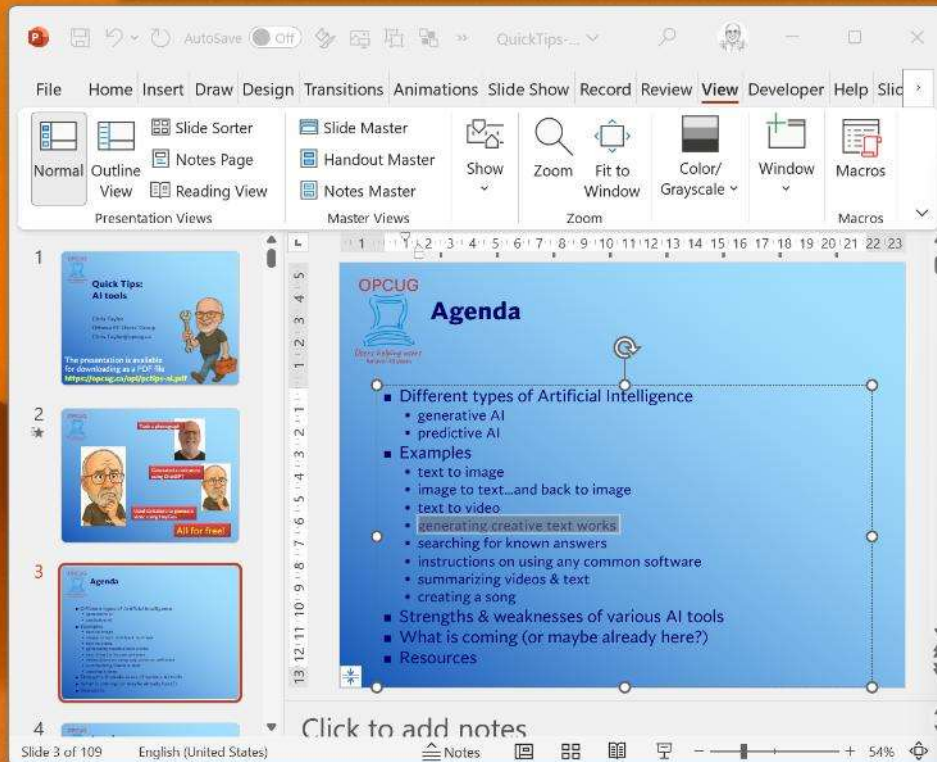

Computer Basics

Microsoft PowerPoint

Create/edit your Agenda slide...

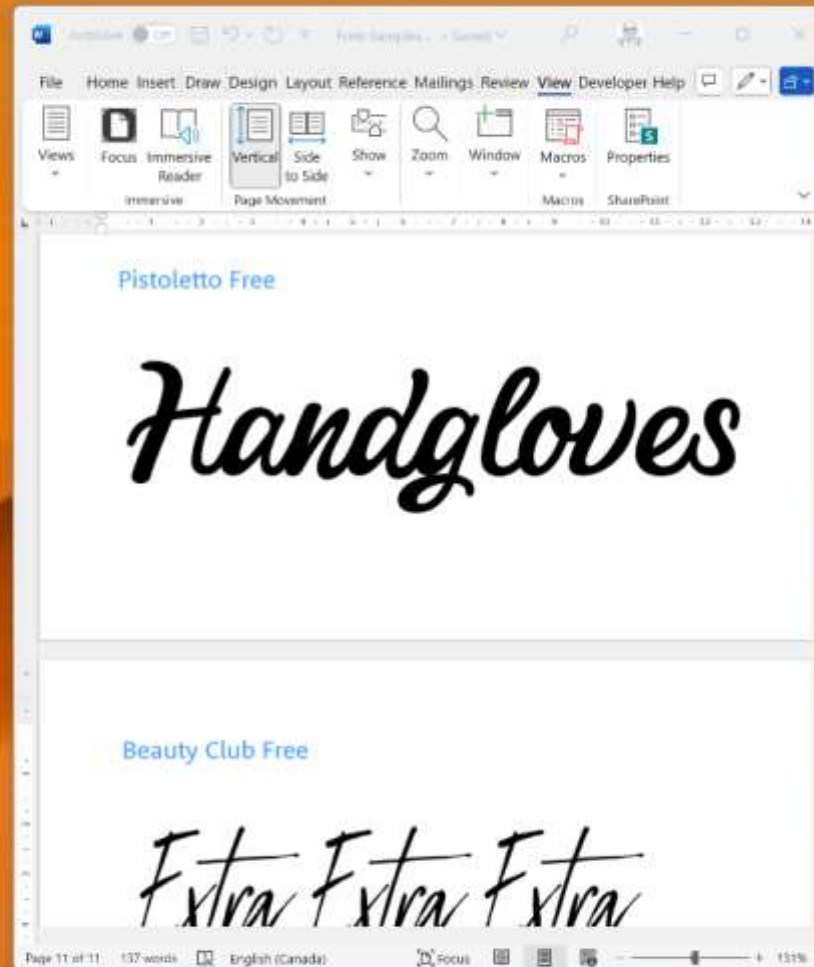

...while going through your slides

Computer Basics

Microsoft Word

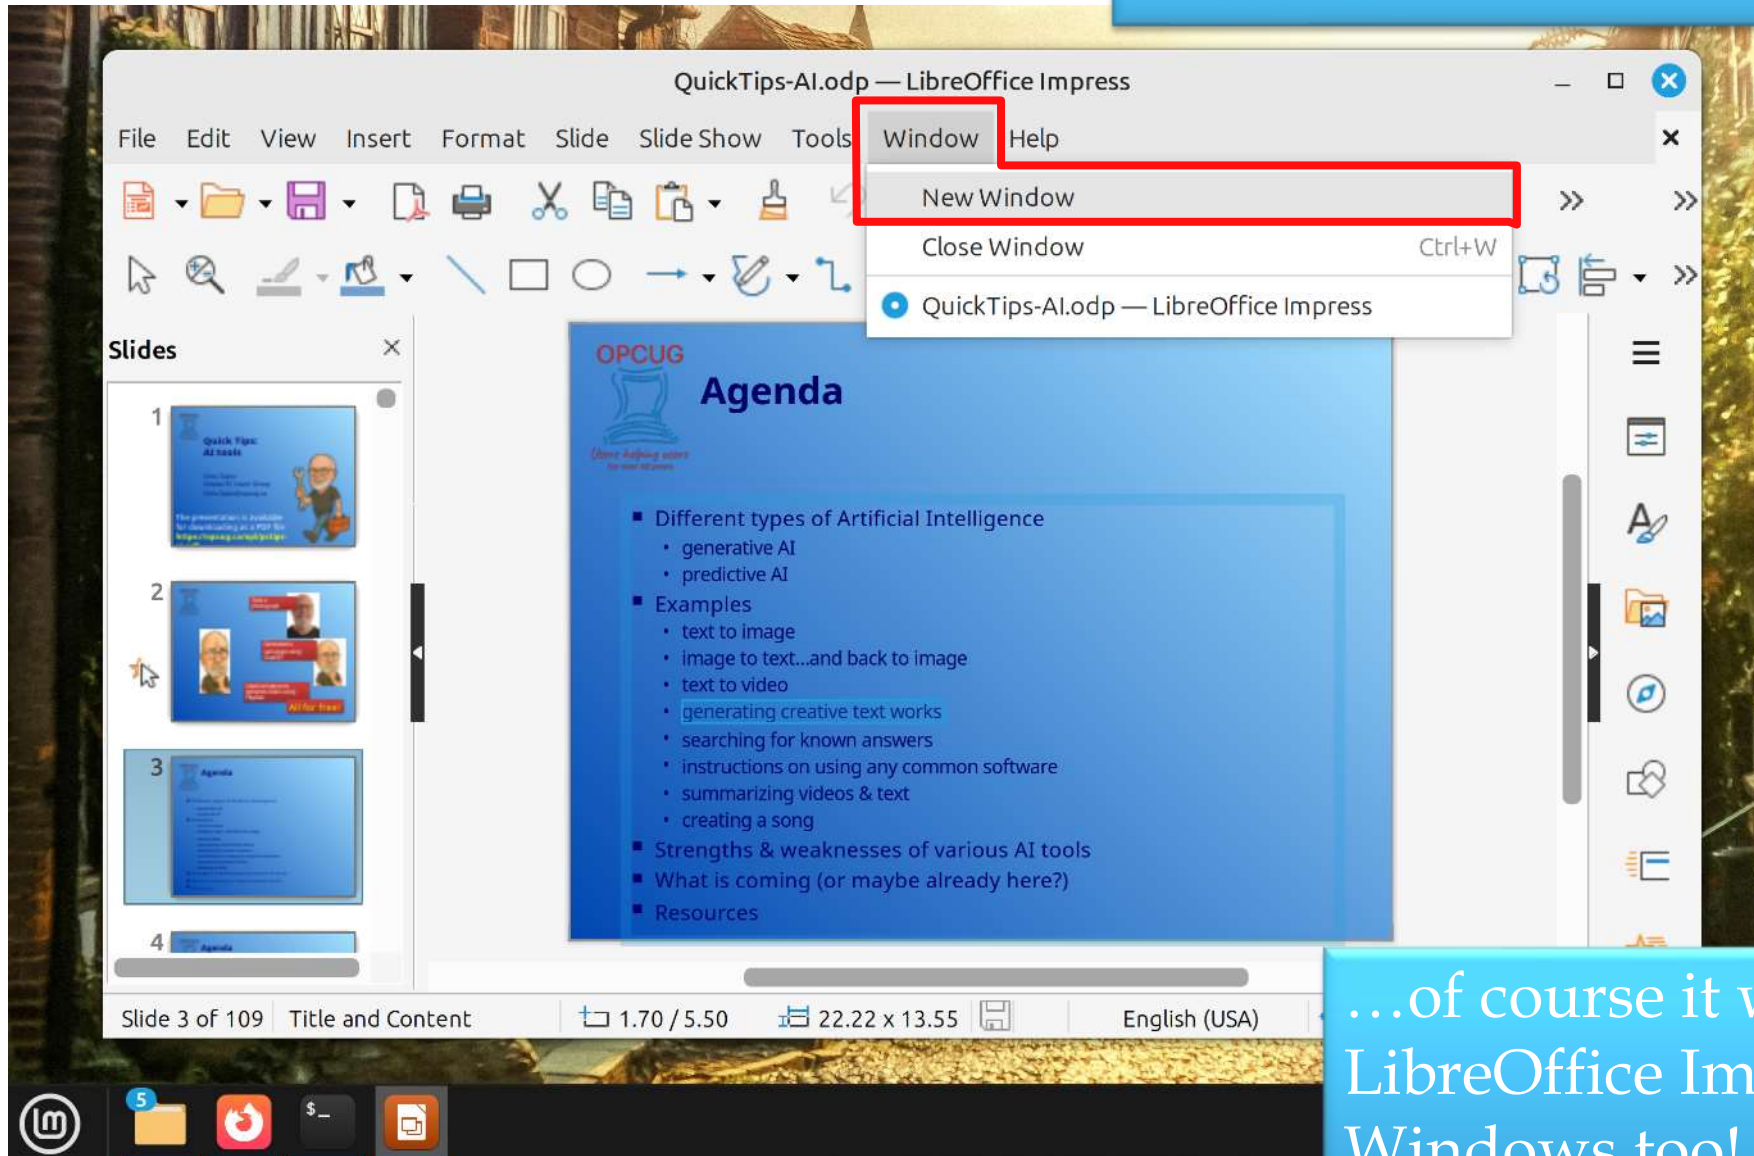

Compare font samples on page 2 and page 11 of a document

LibreOffice Impress in Linux

Window > New Window

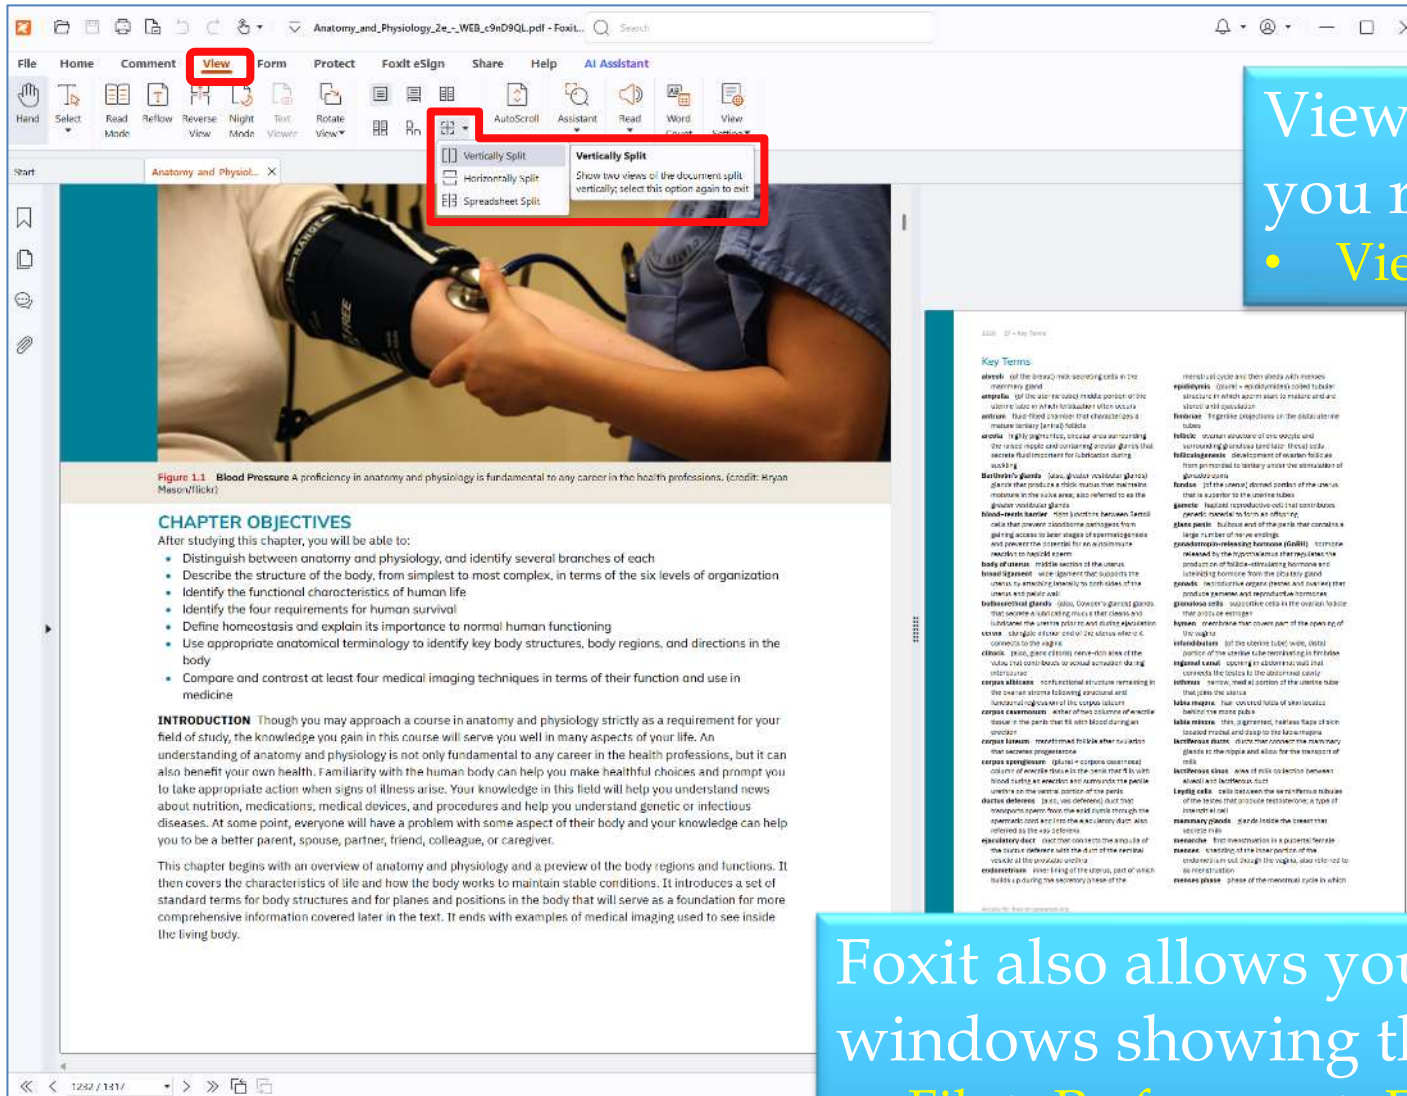

...of course it works in
LibreOffice Impress in
Windows too!

Computer Basics

Foxit Reader (PDF files)

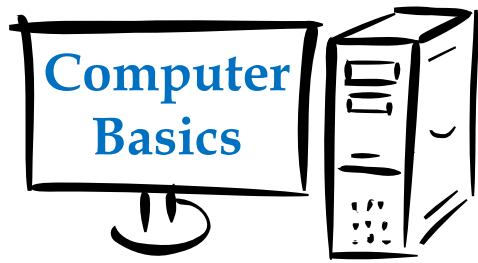

View the glossary as you read a PDF file

• View > Split

Foxit also allows you to open multiple windows showing the same document

- File > Preferences > Documents
- check the option Allow multiple instances

Summary

- Any time you need to view different parts of a document *at the same time*
 - Microsoft Office/365
 - **View tab** in ribbon > **Windows** section > **New Window**
 - LibreOffice
 - **Window** > **New Window**
 - Foxit Reader
 - **View** > **Split** or
 - **File** > **Preferences** > **Documents** > **Allow multiple instances**
 - other programs
 - ask at <https://www.perplexity.ai/>
Can I view different parts of a document at the same time using xyz
- **Remember!**
 - these are **not** separate documents
 - they are **different views** into the same document
 - **changes in one view are reflected in the other view(s)**

**We can (probably) help but,
what is that you need to
know about computers?**

My selfie coming...

Email received next day

To sign up for your own selfie

- <https://space.crunchlabs.com/>

Hi there!

You've successfully signed up for the #SpaceSelfie project. Be sure you've completed the process by uploading your selfie to <https://space.crunchlabs.com/selfie/>

We'll email you again when your selfie is ready to be taken from space. Please be patient and don't forget, sometimes things go wrong in space!

The first batch of selfies will be returning mid-summer. Based on the hundreds of thousands of uploads we have gotten, your wait could be up to a year! If you want to jump closer to the front of the queue and not that long, please make sure you are an active CrunchLabs subscriber ([Build Box](#), [Hack Pack](#)). Or, if you're an educator, reply to this email and let us know that your selfie is a class photo and we'll take your selfie first!

Since you're now an official member of the mission, we'd love to send you a free official SAT GUS "Mission Patch" (*while supplies last*). If interested, [please enter your mailing address here](#).

You can also print out [an official CrunchLabs Space Selfie certificate](#) to display on the wall - or give as a gift!

Oh, know any little ones looking for space-themed activities to do this summer? Check out [Camp CrunchLabs!](#)

Over and out,
Captain Mark Rober and the CrunchLabs Crew
